New water reservoir in Marsfield

Project update: November 2026

- All our work will be finished in December 2026, weather and ground conditions permitting.
- We'll continue to work during the day as we complete our remaining work.
- Please call **1800 943 119** or email **confluence@sydneywater.com.au** to know more.

The new Marsfield reservoir was built to service the growing community. It will ensure we continue to provide clean and reliable water every day.

Finishing works

We recently finished installing a stormwater drain and footpath around the new reservoir. We have started work to build the internal access road, gutters and landscaping between the two reservoir tanks.

Our remaining work through to December 2026 involves:

- final commissioning of the new gauge house.
- removing a temporary inlet pipe and the old gauge house.
- laying new asphalt along the driveway that leads to Abuklea Road.
- removing the project site office and amenities.
- final quality checks, minor adjustments, landscaping and tidying up the site.

At this stage, all our remaining work will be done during the day.

We expect the remaining work to be completed by December 2026, weather and ground conditions permitting. Our lookahead over the page shows our work activities for the remainder of the project.

Our work hours

Our work hours continue to be from **7 am** to **6 pm**, **Mondays** to **Fridays**, and from **8 am** to **1 pm on Saturdays** when required.

We won't work on Sundays or public holidays.

Keep up to date with weekly emails

Join our email list to get weekly updates about our final construction activities. Scan the QR code, call 1800 943 119 or email us at confluence@sydneywater.com.au to join.

You'll only receive emails about this project and we won't share your details without your permission.

What can I expect?

We understand our work can be disruptive at times, but we will make every effort to reduce our impact as much as possible. You may experience:

Noise

Our work over the coming months will be noisy at times while we remove the old gauge house and when we lay asphalt along the site driveway. The level of noise you may experience each day will vary based on the position of our work area near the tanks and along the driveway.

You may hear noise from our other machinery including engines and reversing tones. We'll keep noise to a minimum, avoid unnecessary loud noises and follow all mitigation measures in the construction environmental management plan.

3 November 2026

Truck movements

There will continue to be some vehicle movements in and out of the site from Abuklea Road during our standard working hours.

We'll avoid parking our trucks on the street wherever possible. When needed, our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic.

Dust

Our work can cause dust. We are managing this by wetting down work areas and covering stockpiles when not in use.

Other Sydney Water work in your area

Sydney Water is also bringing the Ryde to Pymble drinking water pipeline back into service. Work on Agincourt Road is underway.

For more information, please call 1800 664 935 or email rydepymblepipeline@sydneywater.com.au

Where do I get more information?

To know more about our final activities for the new Marsfield Reservoir, please contact us at confluence@sydneywater.com.au or call 1800 943 119.

Thank you for your patience and understanding during this important work.
