Your savings at home really count

Dam levels have increased, but with the challenges of climate change and population growth, we still need to be water wise. Here are some easy ways to save water in your home.

Take advantage of the washing machine rebate

In the market for a new washing machine? Don't forget you're eligible for a \$150 rebate if you buy a new washing machine with at least a 4-star water efficiency rating.

Water efficient machines can save more than 21,000 litres of water a year. With about 130 models to choose from, there's one to suit every household. Ask your retailer for details or visit www.sydneywater.com.au

Save water with smart gardening

Get expert advice on the exact watering needs of your garden. It costs just \$33 or \$55 depending on the size of your garden. Register for Love Your Garden - phone 1800 354 105 (8.30am - 5pm, Monday to Friday).

WaterFix your home today

If you haven't already, join more than 440,000 households across Sydney, Illawarra and the Blue Mountains that have taken up the WaterFix offer. From just \$22* a licensed plumber will visit your home to install water saving devices and check for minor leaks.

To register:

- phone 1800 502 494 between 8am to 8pm Monday to Friday, or 8am to 2pm on Saturday
- visit www.sydneywater.com.au

* Basic showerheads are available for \$22 each.

It's all part of the plan

Our water saving offers are all part of the NSW Government's plan to secure our water supply. Other initiatives underway include:

- building a wind powered desalination plant
- expanding Australia's largest residential recycling scheme at Rouse Hill
- inspecting over 18,000 km of pipes for hidden leaks and improving response times when a leak occurs
- allocating funds to help businesses save water and energy.

Water quality update

Sydney Water provides you with high quality, safe drinking water – treated to meet the Australian Drinking Water Guidelines.

Your water is routinely monitored and tested for up to 70 different characteristics including taste, colour, odour, micro-organisms and chemical content.

- ✓ For the characteristics tested during the period 1 October to 31 December 2007, your water complied with the Australian Drinking Water Guidelines.

For more detailed information see the *Quarterly Drinking Water Quality Report 1 October to 31 December 2007* or the summary at www.sydneywater.com.au

A free copy is available by visiting our Sydney City Customer Centre.

Did you know?

Sydney Water tests for the true colour of water. Water should be virtually colourless.

Are you water efficient?

Compare your average daily water use from your bill with our targets for water efficient households.

Shown here are typical amounts of water used by water efficient households with an average sized house and garden.

For more information about the size of your property visit www.sydneywater.com.au

Exciting careers at Sydney Water

Want to join a world leader in an industry that is as essential to our community as the water it delivers? Our staff play an important role in protecting and ensuring our water supply for the future.

Whether you are experienced or just starting your career, Sydney Water has many career opportunities in a range of fields. Find out more by visiting www.sydneywater.com.au

Join us at Taronga Zoo in April for Sydney Water Month

To celebrate, Sydney Water is running a water wise activity for children at Taronga Zoo on weekends, and public and school holidays. It's free and every participating child wins a prize.

You can also collect a free* DIY water saving kit at the zoo. It can help you save up to \$50 on your energy and water bills and about 16,000 litres of water a year.

* Terms and Conditions apply
