Trade wastewater fees and charges for 2019-20

IPART has determined that Sydney Water will adjust all trade waste fees and charges from 1 July each year (IPART determination No 5, 2016). The prices listed here apply for one year from 1 July 2019.

This fact sheet lists the commercial processes that require a formal written permit and explains the fees and charging rates for 2019-20.

Charges for commercial customers consist of:

- management charges
- waste quality charges.

Management charges

Permit fees

Permit fees cover our costs to manage permits for discharging trade wastewater to the wastewater system including the cost of:

- planned inspections
- monitoring
- administering permits.

Additional inspection fees

Sydney Water includes planned inspections in the permit fees. An additional inspection fee will apply, if additional inspections are needed to monitor a trade waste discharge to ensure a customer complies with requirements.

Wastesafe

Wastesafe is the electronic tracking system we use to monitor the generation, collection, transport and disposal of grease trap waste.

If you have a grease trap, you must have a Wastesafe transporter clean it out, at the frequency we set.

Your Wastesafe transporter will charge you directly for:

- cleaning your grease trap
- transporting your grease trap waste to a treatment facility
- treating your grease trap waste at the treatment facility.

Sydney Water will charge you:

- a fixed liquid waste trap (grease trap) charge of \$29.19 a quarter
- a missed service (pump out charge) of \$320.00 for grease traps of 2,000 litres or less
- a missed service (pump out charge) of \$640.02 for grease traps over 2,000 litres.

Waste quality charges

Sydney Water assesses concentrations for commercial processes, based on representative sampling. Each process is assigned to a charging band, to determine a volumetric charging rate.

Where the property is separately metered we will, if possible, apply a discharge factor, to determine how much trade wastewater is discharged. Where the property is not separately metered, we assess how much is discharged, based on a representative sample of similar businesses.

Commercial customers pay charges based on the mass of pollutants they discharge to the wastewater system. The quality of trade wastewater for commercial customers is based on historical records for the particular process.

Similar processes are grouped together and have an associated **charging rate**, expressed as \$/kL (kilolitre). Where we need the volume of trade waste discharged to the wastewater system to be measured, we may need the customer to install a check meter to accurately measure how much water is supplied to a process that generates trade waste.

Sydney Water may charge more where customers have poorly maintained or inadequate pre-treatment equipment.

See the tables over the page for commercial processes and charging codes

Charges for 2019-20

Application fee	No fee
Variation fee	No fee
Additional Inspections	\$217.60 per inspection
Liquid waste (grease trap) trap charge	\$29.19 per quarter
Missed service	\$320.00 (2,000 litres or less) \$640.02 (more than 2,000 litres)

Quarterly permit fees

First process	\$41.04
Each additional process	\$14.09

Sale of trade waste data

Certain sections of commercial permits are subject to public disclosure. Sydney Water will prepare and present trade waste data to meet a customer's needs at a cost of \$172.50 an hour (includes GST).

Commercial processes and charging codes

Process group	Charging rate (\$/kL)
High-strength BOD food* Fried chicken BOD > 2000 mg/L Asian style BBQ Ice cream parlour Bakery retail - hot breads, cakes	4.029
Low-strength BOD food* Hamburger restaurant (with vertical gravity separator) Cafeteria, canteen and school - hot meals Take-away, including fish and chips, hot chicken Snack bar, coffee lounge, hot foods Restaurant - food court Kitchen - hospital, nursing homes Hamburger restaurant (Non VGS) Pizza restaurant Function centre Fried chicken BOD < 2,000 mg/L Delicatessen with hot food <12 kL/day Wholesale food <12 kL/day, caterer Hotel/ motel kitchen Butcher - retail Fish (fresh outlets), no cooking Chicken (fresh retail), no cooking Smallgoods < 12kL/day maximum Wholesale butcher < 12 kL/day maximum Bakery retail - pies, sausage rolls	2.452
Automotive Service station under canopy forecourt Panel beating and spray painting Car detailer Car wash - hand wash and pressure spray Car wash - mechanical <12 kL/day Mechanical workshop, auto recyclers	0.800

* If the pre-treatment is not maintained, a higher charge of \$12.581/kL applies for low strength BOD food and high strength BOD food.

Process group	Charging rate (\$/kL)
Commercial laundry	
Laundromat	0.500
Commercial laundry < 2 ML/yr	
Laundry – hospital, nursing home, hotel < 2 ML/yr	
Small dyers < 600 L/day	
Equipment hire washing	3.653
Lithographic processing	0.385
Photographic	
Waterless minilab, with silver recovery unit (SRU)	Nil
Waterless minilab, used chemistry taken off-site	
Waterwash minilab, with SRU	
Waterwash minilab, silver rich wastewater transported off-site	
Xray, with SRU	
Xray, silver rich wastewater transported off-site	
Graphic arts film, with SRU	
Graphic arts film, silver rich wastewater transported off-site	
Photo outlab, with SRU	
Professional lab, with SRU	
Wholesale lab, with SRU < 2 kL/day	
Microfilm processing, with SRU	
Educational institution – black & white photo only	
Dental hospital, silver rich wastewater transported off-site	
Ship to shore pump out	Nil
Miscellaneous	
- School laboratory	Nil
- Municipal pool/aquatic centre	
Other	
Wastesafe only, includes school domestic science	Nil
Screen printing	
Battery room – commercial
