

The water cycle song

By Monica Sheba

To the tune of *She'll be comin' round the mountain*

Water goes round in a circle, yes it does
(Use finger to draw a large circle in the air)

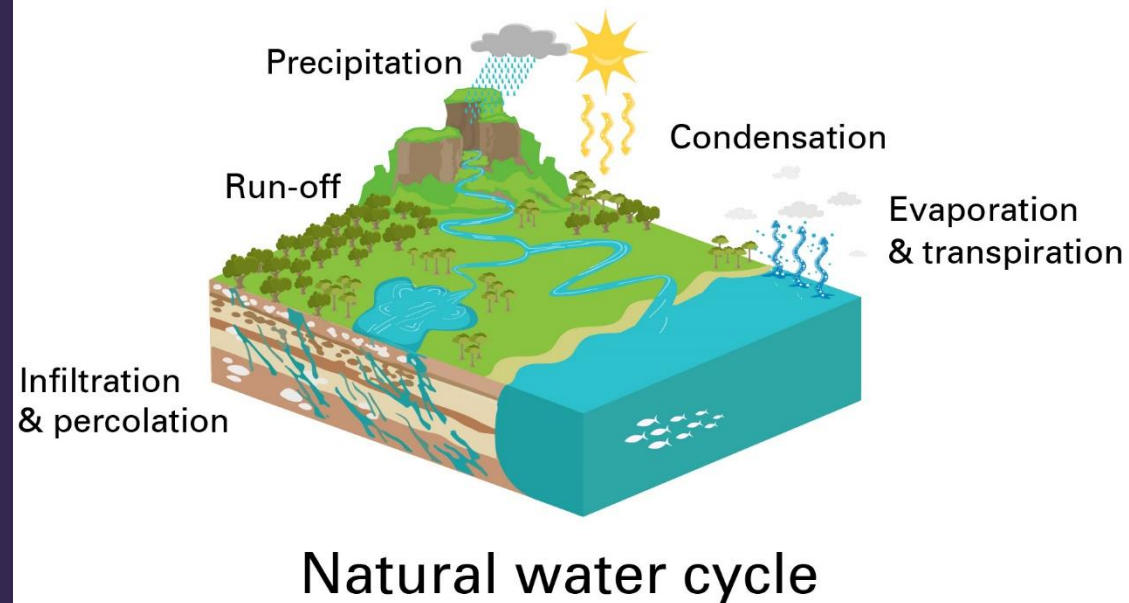

Water goes round in a circle, yes it does
(repeat the motion)

It goes up as evaporation
(raise arms with palms up)

And makes clouds and condensation
(bring hands above head and form a cloud shape)

Then falls down as precipitation, yes it does
(slowly lower hands with wiggly fingers)
