Sydney Water Monitoring Services

The one stop service provider for publicly-accessible swimming pools

Swimming Pools and Spa Pools (Public)

*Public Health Act 2010 and
Public Health Regulation 2012*

As you are aware, the NSW Ministry of Health legislation recommends that all swimming pools and spas (with the exception of private residences) be independently laboratory-tested for biological parameters and records maintained on a regular basis. (www0.health.nsw.gov.au/factsheets/environmental/microbiological_test.html)

Our service

*Scheduling, sampling, sample delivery,
analysis and reporting*

Sydney Water offers a complete water testing service. We can look after all your testing requirements or, you can choose which step of the process you'd like us to take care of.

Our Customer Service group will schedule all activities so you don't have to remember when to take samples.

We have NATA accredited sampling and analysis processes, we own a fleet of sampling vehicles and can arrange couriers for transport.

Your results are emailed to you, in your preferred format, so that you don't have to manually enter data.

Sample bottles with preservative are provided to you free of charge.

Quality

Not all laboratories are the same!

Sydney Water owns and operates the leading water quality laboratory in Australia.

Our results are NATA accredited and meticulously accurate.

Emergencies

Sydney Water is your resource

Sydney Water operates 7 days per week and therefore can provide an emergency service.

In the event of a failed result, we can promptly arrange a resample and retest so that your pool remains open to the public.

In a worst case scenario, our laboratory is the only NATA accredited laboratory in Sydney that can offer Cryptosporidium, Giardia and virus tests.

Not only can we confirm the presence or absence of unwelcome organisms, we can confirm human viability if it is a requirement of the authorities.

Pricing and enquiries

Prices start from \$55 per month
