

Kemps Creek Dual Pressure Mains Bonds Creek Carrier Extension Community update

December 2024

Sydney Water is building essential infrastructure to support the population and economic growth of western Sydney

Our infrastructure delivery is timed to support the NSW Government's growth ambitions and is aligned with housing supply policy. New infrastructure, amplifications and upgrades will ensure the resilience and reliability of our water supply for generations to come.

Benefits for our customers and communities include supporting more than 15,000 jobs by 2026, with servicing to over 3000 dwellings in the catchment.

Kemps Creek Dual Pressure Mains

We'd like to thank the community for their ongoing patience and understanding as we progress with this essential work.

Construction is underway at multiple locations around Kemps Creek to install two pipelines using both trenching and tunnelling techniques.

Our team is committed to minimising disruption to the local community while ensuring our rigorous safety and environmental standards across all sites.

Floribunda Road

Tunnelling to install 900 metres of dual pressure mains between Floribunda Road and Gurner Avenue is well underway.

We have successfully installed the first pipeline and are now working on the second.

From early 2025, we will start trenching along Floribunda Road to the corner of Grant Close. We expect to complete this section of work in mid 2025, weather permitting.

Cross and Pratten Streets

Most of our trenching along Pratten Street is complete with some minor work to connect the pipeline occurring in early 2025.

Trenching activities along Cross Street will continue until March 2025, weather permitting.

Trenching work along Cross Street

Sydney
WATER

Tavistock Road

Trenching between 70 Floribunda Road and the end of Tavistock Road's cul-de-sac is currently underway.

You can expect increased truck movements in this area as we access the construction work corridor from the end of the road until mid 2025.

Exeter Road

We have almost completed the first tunnel between Exeter Road and Pratten Street. From late December 2024 until March 2025, we will add another drill rig for the second pressure main. Both drill rigs will be in operation until mid 2025, weather permitting.

Elizabeth Drive

Great progress has been made with the drilling of the first micro tunnel completed in early December 2024. Our focus now is on installing the wastewater pipe into the micro tunnel.

We have now completed the majority of the pipeline installation between M12 and Elizabeth Drive, with only 100 metres trenching pipeline to be installed at 1383-1411 Elizabeth Drive following the completion of the micro tunnel.

This work is expected to be completed by mid 2025, weather permitting.

M12 Corridor

All construction activities along the M12 Corridor are now complete. We'd like to thank the nearby residents for their understanding and patience while the pipelines were installed. Below is an image of the restored corridor which we have planted out with local native grass mix. The great weather we have had recently has helped it establish and grow, ready for its first mow.

Restored M12 corridor following our construction activity

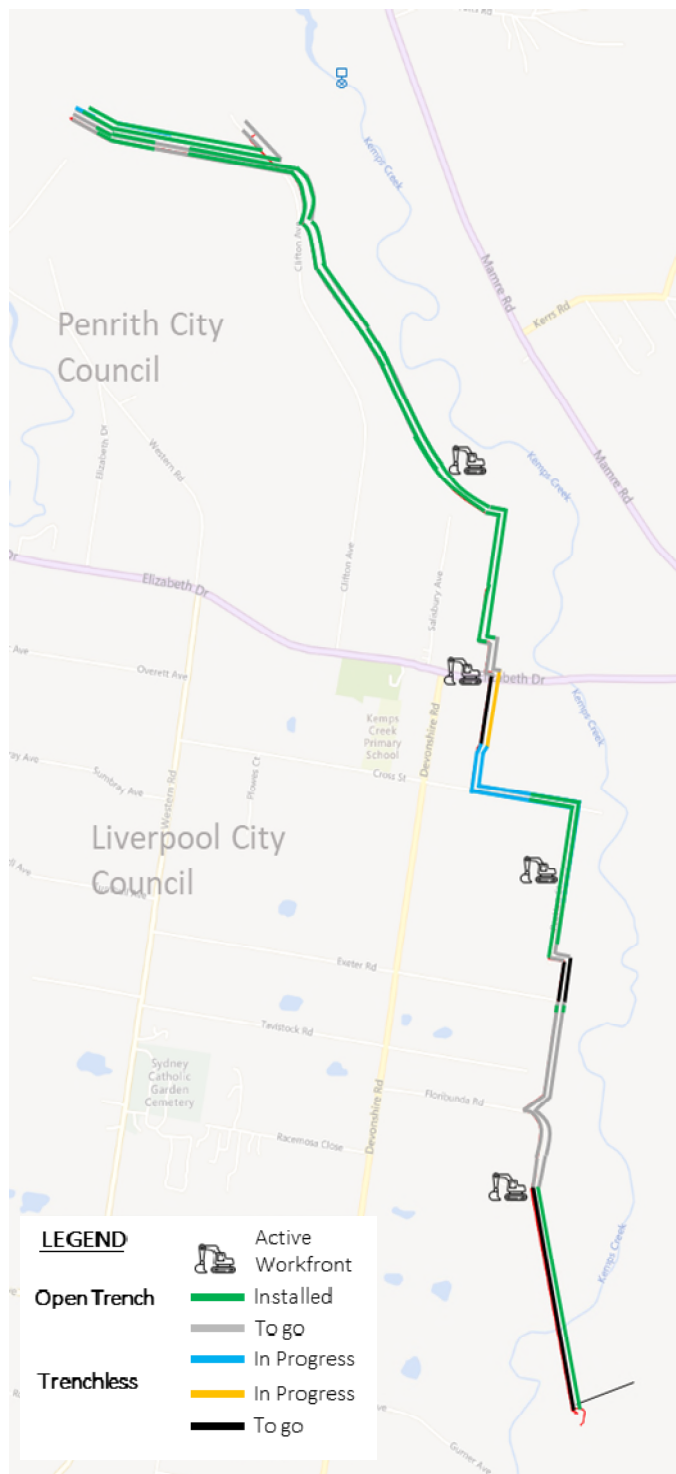

Badu Maru Grove

Major trenching activities in this area are progressing as planned and are expected to be finished in early 2025, weather permitting.

Our standard work hours

Monday to Friday	7 am to 6 pm
Saturday	8 am to 1 pm

There will be **no work on Sundays or public holidays.**

Construction status for the pipeline alignment

Bonds Creek Carrier Extension

Early work on this pipeline has started and will continue to throughout December 2024.

In early 2025, we will begin construction with work occurring in the following locations across Austral:

- Eleventh Avenue
- Tenth Avenue
- Ninth Avenue
- Eighth Avenue
- Fourth Avenue.

Our construction activity will involve:

- building hardstands and access tracks to facilitate construction activities
- excavating pits for micro-tunnelling work
- constructing maintenance holes and installing ventilation shafts
- vegetation clearing where required
- restoring affected work areas.

We are working with landowners and will continue to keep the community informed with regular progress updates throughout 2025.

Managing our impacts

Minimising the impacts of our work on the local community is a high priority for Sydney Water.

While there will be times when our construction activities may create noise, dust, and other impacts, we will try to minimise them by:

- installing noise barriers where necessary
- minimising dust by using regular water carts
- turning off vehicles and equipment when not in use
- temporarily restoring affected areas to ensure continued use by backfilling open trenches and applying seeding or spray grassing to impacted areas
- working with our neighbours to ensure access to properties is maintained at all times.

We will have traffic control and signage in place to guide you safely through our work areas. Please follow speed limits and any instructions from our Traffic Controllers.

Restoration

When construction is finished, permanent restoration work will begin in consultation with landowners, the community and other Government organisations, such as Liverpool City Council, Penrith City Council and Transport for NSW.

Our standard work hours

Monday to Friday: 7 am to 6 pm
Saturday: 8 am to 1 pm

There will be **no work on Sundays or public holidays.**

Holiday season shutdown

Although our Kemps Creek tunnelling team will be working through the holidays, our team working along Bonds Creek will take a break from **Saturday, 21 December 2024** and return on **Monday, January 6, 2025.**

We appreciate your patience and understanding as we continue this essential work and wish you and your families a safe and happy holiday season.
