Liverpool Water Cycle Management Project

October 2026

Upcoming Investigation work | Georges Hall

Our wastewater system works behind the scenes to protect the environment and support growing communities. To help plan for future infrastructure, we'll be carrying out investigation works in your area.

- Investigation works are expected to commence from Monday **26 October 2026** and continue for up to six weeks, subject to weather conditions and site requirements.
- Work will generally occur between **7am and 6pm, Monday to Friday**.
- For more information, please call **1800 650 221** or email **lwcmp@sydneywater.com.au**

What are we doing?

Sydney Water is undertaking site investigations to better understand ground conditions, existing underground services and site constraints. This information will help inform future planning and design activities.

Investigations may include:

- Surveying and utility locating
- Geotechnical investigations, including borehole drilling
- Soil and contamination sampling

Where will investigations occur?

Investigations are proposed at locations in Georges Hall, including Rabaul Road, Coleman Park, Ashcroft Street, Rex Road, Ballina Road, Amaroo Avenue, Harden Reserve and Sturt Reserve.

What do I need to know?

Investigation teams may be working within road reserves, verges and public open spaces near your property.

To safely complete these investigations, we may need to implement:

- temporary traffic control measures
- short-term changes to on-street parking
- pedestrian detours around active work areas.

Access restrictions will be limited to the immediate work area during investigations. Your water and wastewater services will not be affected.

At this stage, access to private property is not expected. If property access becomes necessary, affected residents will be notified in advance.

What can I expect?

Some activities, particularly geotechnical drilling, may generate temporary noise during work hours. Investigation equipment, vehicles and workers may also be visible in the area while works are taking place.

Sydney Water and its contractors will take reasonable measures to minimise impacts on the community, public land and surrounding vegetation. Any disturbed areas will be reinstated, where practicable, following completion of the investigations.
