

Project update: Menangle Park Wastewater Servicing

10 July 2025

Dear Resident,

We are enhancing the water and wastewater infrastructure in Menangle Park to support the growing community. This project is part of a broader strategy to ensure reliable and sustainable water services in the Greater Macarthur region. This wastewater infrastructure will service about 4,000 new residential lots.

Our delivery partner, West Region Delivery Team is constructing a wastewater pumping station situated at the corner of Menangle Road and Danehill Avenue, Menangle Park. This work is expected to be completed by 2026, weather and ground conditions permitting.

Pumping station SP1238

West Region Delivery Team will soon commence construction activities including, site mobilisation for the second wastewater pumping station, located on Menangle Road and north of the intersection with Rotolactor Parade, Menangle Park as indicated in the image below.

About the work

The work is planned to commence week starting **Monday 14 July 2025** and is expected to take 24 months to complete, weather and ground conditions permitting.

We will be working during standard work hours from **7 am to 6 pm Monday to Friday** and **8 am to 1 pm on Saturday**. If we need to work outside these hours, we will let you know.

During the work you may notice temporary impacts including:

- Increase vehicles and equipment operating and travelling to and from the plant.
- Increased activity around the work area (including heavy vehicle and equipment movements)
- When we need to work within the road reserve, a temporary partial lane closure and detour will be in place, where possible.
- To ensure the safety of our workers and the local community, signage and traffic control measures will be in place.
- Access to property will be maintained for residents.

How we'll manage our work

We know our work can be disruptive, so we'll make every effort to minimise impacts to you and keep you updated as the work progresses.

Our work will require the use of machinery that generates noise and some vibration. To minimise the impact of this work, we will:

- turn off machinery when not in use
- fit equipment with devices to minimise noise, particularly non-tonal reversing beepers
- monitor noise periodically so we can manage any potential impacts and adjust our work as required
- environmental controls and mitigation measures will be in place to minimise any impacts to residents.

Where do I get more information and help?

To know more about this work, you can scan the below QR code with your mobile phone for more details. You can also contact our community engagement team on 1300 653 817 or email WestRegionDelivery@sydneywater.com.au.

For future updates...

If you would like to receive updates via email, please provide us your details to our email.

For other Sydney Water repairs or faults, please call 13 20 90 (24 hours).

For billing and general enquiries, call 13 20 92.

Yours sincerely

Hilary McMahon
