New water reservoir in Marsfield

Project update: August 2026

- All our work should be finished by October 2026, unless weather or ground conditions cause delays.
- We'll continue to work during the day as we complete our remaining work.
- Please call **1800 943 119** or email **confluence@sydneywater.com.au** to know more.

We're building a new water reservoir in Marsfield to service the growing community. Our work will ensure we continue to provide clean and reliable water every day.

The new reservoir is full of drinking water and ready for use.

Completion work

We recently finished installing a new pipe under the driveway that leads to Abuklea Road. In August 2026 we'll complete quality checks and minor tasks across the site to get everything ready for operation.

Our remaining work through to October 2026 involves:

- final connections and commissioning of the new gauge house.
- installing a small section of pipework near the new reservoir and behind the existing reservoir (closer to Agincourt Road).
- removing a temporary inlet pipe and the old gauge house.
- installing a stormwater drain and footpath around the new reservoir.
- building the access road, gutters and landscaping between the two reservoir tanks.
- laying new asphalt along the driveway that leads to Abuklea Road.
- final quality checks, minor adjustments and tidying up the site.

At this stage, all our remaining work will be done during the day.

We expect all our work to be completed by October 2026, weather and ground conditions permitting. Our lookahead over the page shows our work activities for the remainder of the project.

Our work hours

We may need to work extended hours for up to two shifts in September 2026, while we complete an important part of the commissioning process. During these shifts, we'll work **from 7 am up to 8 pm**. We'll keep you informed via our weekly construction email updates.

All our other work will continue to be carried out from **7 am** to **6 pm**, **Mondays** to **Fridays**, and from **8 am** to **1 pm on Saturdays** when required.

We won't work on Sundays or public holidays.

Keep up to date with weekly emails

Join our email list to get weekly updates about upcoming construction activities. Scan the QR code, call 1800 943 119 or email us at confluence@sydneywater.com.au to join.

You'll only receive emails about this project and we won't share your details without your permission.

What can I expect?

We understand our work can be disruptive at times, but we will make every effort to reduce our impact as much as possible. You may experience:

Noise

Our work over the coming months will be noisy at times while we lay asphalt, install pipes and build the access road between the two tanks. The level of noise you may experience each day will vary based on the position of our work area near the tanks and along the driveway.

You may hear noise from our other machinery including engines and reversing tones. We'll keep noise to a minimum, avoid unnecessary loud noises and follow all mitigation measures in the construction environmental management plan.

Truck movements

There will continue to be some vehicle movements in and out of the site from Abuklea Road during our standard working hours.

We'll avoid parking our trucks on the street wherever possible. When needed, our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic.

Dust

Our work can cause dust. We are managing this by wetting down work areas and covering stockpiles when not in use.

Other Sydney Water work in your area

Sydney Water is also bringing the Ryde to Pymble drinking water pipeline back into service. Work on Agincourt Road is underway.

For more information, please call 1800 664 935 or email rydepymblepipeline@sydneywater.com.au

Where do I get more information?

To know more about our final activities for the new Marsfield Reservoir, please contact us at confluence@sydneywater.com.au or call 1800 943 119.

Thank you for your patience and understanding during this important work.

We're finishing minor work on the new gauge house before it's commissioned.

WORK COMPLETED SO FAR

Set up site amenities and removed trees.

Installed and connected temporary pipes to the existing reservoir.

Built a new temporary gauge house and removed the original gauge house.

Excavated and removed soil to level the site.

Installed permanent pipes and chambers to help service the new reservoir.

Installed the new water quality kiosk.

Laid the concrete foundation for the new reservoir tank.

Built the reservoir floor, walls and roof.

NEXT THREE MONTHS

Indicative only. Subject to weather, ground conditions and how our work progresses each week.

AUGUST

Commissioning

The new reservoir tank is now filled. The tank, gauge house, water quality kiosk and pipes will be commissioned.

Impacts: *General construction noise. Some minor excavation will be required at times.*

SEPTEMBER

Final pipe and access road installation

We'll finish installing our on-site pipes and remove the temporary gauge house and pipework. We'll build stormwater pits and a new kerb and gutter around the new reservoir. We'll also install a new access road inside our site.

Impacts: *Typical construction noise, including excavators and rollers, with some noisy periods.*

OCTOBER

Restoration and landscaping

We'll restore the site and remove our temporary site offices and amenities.

Impacts: *Typical construction noise.*

VERY NOISY AT TIMES:
Very noisy periods each day, but not constant

GENERAL NOISE:
Typical construction noise, no very noisy periods expected
