

We are working in your area

October 2026

Sydney Water is planning future upgrades to the drinking water network to help meet growing demand and support new housing. These improvements will increase the amount of water the network can deliver and help ensure a reliable and resilient water supply for current and future customers. As part of this early planning work, we will be carrying out geotechnical investigations to better understand local ground conditions.

What do you need to know?

We are carrying out early investigations to help inform planning for future water infrastructure in the area. The work involves scanning the area, locating existing underground services and drilling a small hole to take soil samples and better understand the ground conditions below the surface. The hole will be approximately 125 mm wide (about the width of a drink can) and up to 15 metres deep. The work will take place within Best Road Reserve shown on the map overleaf, at Seven Hills. A drilling rig, vacuum truck, trucks and support vehicles (up to three vehicles on site) will be used to carry out the work and safely manage excavated material.

Investigation timeline

Our investigations will take up to 2 days to complete, weather and ground conditions permitting. Work is scheduled to start on Thursday 15 October and is expected to finish by Friday 16 October 2026.

Work hours

Our standard working hours are: 7:30am-6pm, Monday to Friday

No work will be carried out on weekends or public holidays.

Traffic and pedestrian access

You may notice a temporary increase of construction vehicles along Best Road and Third Avenue while the work is being undertaken. Safe work zones will be setup around the drill rig and hole location. Access for pedestrians and vehicles along both roads will be maintained at all times.

All activities will be carried out in accordance with relevant environmental and safety requirements.

Managing disruption

These investigations may result in some temporary impacts, including noise, vibration and changes to access around the work area. To minimise disruption, we will:

- monitor and review noise levels
- turn off equipment and vehicles when not in use
- keep the work areas as small as possible and restored promptly following completion of investigations
- provide nearby residents with at least 7 days' notice of upcoming work
- temporary minor diversions may be required within the work area during investigations, which may affect pedestrians and Best Road Reserve users.
