Night work on Johnson Avenue and Lowry Road intersection, Seven Hills

November 2026

Sydney Water is planning future upgrades to the drinking water network to help meet growing demand and support new housing. These improvements will increase the amount of water the network can deliver and help ensure a reliable and resilient water supply for current and future customers. As part of this early planning work, we will be carrying out geotechnical investigations to better understand local ground conditions.

What do you need to know?

We are carrying out early investigations on Johnson Avenue, Seven Hills. The work involves scanning the area, locating existing underground services and drilling a small hole to collect soil samples and better understand ground conditions below the surface. The hole will be approximately 125 mm wide (about the width of a drink can) and up to 15 metres deep. A drilling rig, vacuum truck and support vehicles (up to three vehicles on site) will be used to carry out the investigations and safely manage excavated material. This work needs to be carried out at night to reduce impacts on daytime traffic in the area. The work will take place on Johnson Avenue, immediately south of Lowry Road in Seven Hills, as shown on the map overleaf.

Investigation timeline

Night work is scheduled for **Monday 9 November 2026**, weather and ground conditions permitting. If the work cannot proceed on this date, it may be rescheduled to Tuesday 10 or Wednesday 11 November 2026. We will provide an update if the timing changes.

Work hours

Our standard night work hours are: 7pm-5am, Monday to Friday. No work will be carried out on weekends or public holidays.

Traffic and pedestrian access

Temporary traffic management will be in place on Johnson Avenue near the Lowry Road intersection. A section of the central median and one traffic lane in each direction will be temporarily closed to allow investigation works to be undertaken safely. Access along Johnson Avenue will be maintained. You may notice a temporary increase in construction vehicles on Johnson Avenue while investigation works are underway. Minor delays may occur, please allow additional travel time. Please follow all temporary signage and directions from traffic controllers. All activities will be carried out in accordance with relevant environmental and safety requirements.

Managing disruption

These investigations may result in some temporary impacts, including noise, vibration and changes to access around the work area. To minimise disruption, we will:

- keep vehicle movements to a minimum and avoid unnecessary loud noises during night-time
- keep the work areas as small as possible and restored promptly following completion of investigations
- provide nearby residents with at least 7 days' notice of upcoming work
- temporary traffic management will be in place on Johnson Avenue near the Lowry Road intersection during investigations, including temporary lane closures, which may affect pedestrians and road users.
