North West Treatment Hub

Sydney WATER

Monday 12 October 2026

Upcoming night work in your area

As part of ongoing upgrades at the Castle Hill Water Resource Recovery Facility, we need to carry out some work outside our standard construction hours.

What you need to know

We need to temporarily shut down part of the wastewater treatment process to complete maintenance work. This work must be completed during periods of low flow within the treatment plant, which can only occur overnight.

We are planning to carry out this work over the following nights:

- 10pm-6am, Monday 19 October
- 10pm-6am, Tuesday 20 October

If the work cannot proceed as planned due to flow levels, the following contingency nights may be required:

- 10pm-6am, Monday 26 October
- 10pm-6am, Tuesday 27 October

All other work will continue during our standard construction hours:

- 7am-6pm, Monday to Friday
- 8am-1pm, Saturdays

No work on Sundays or public holidays

What can you expect?

Most work will take place within the treatment plant. During these works, you may notice:

- Noise from equipment such as pressure washers, pumps and hand tools
- Occasional use of a vacuum truck and telehandler
- Work vehicles entering and exiting the site

We understand that working at night can be disruptive, and we will take steps to reduce impacts where possible. This includes:

- Switching off plant and equipment when not in use
- Planning and sequencing work to minimise noise where feasible
- Completing noisier activities earlier in the shift where possible
- Avoiding unnecessary vehicle movements

Where can I get more information?

If you would like to know more, please contact our team on 1800 560 682 or email NorthWestTreatmentHub@sydneywater.com.au.

For questions or enquiries during the work, please contact our Site Supervisor on 0429 779 960.

Thank you for your cooperation during this essential work.
