Parry Park

Waterway Health and Amenity Improvement Project

A greener, healthier Parry Park

1. New wetlands to naturally treat stormwater
2. New habitat for Green and Golden Bell Frogs
3. Accessible walking track
4. New seating and rest area
5. New half-court basketball court

What's planned for Parry Park?

We're planning improvements to Parry Park, Punchbowl Road, Lakemba to create a greener, more enjoyable space for the community. The project will include new wetlands, enhanced landscaping, a new half-court basketball court, improved paths and community spaces, and more trees and native plants.

The Parry Park improvement project is being planned by Sydney Water and Canterbury-Bankstown Council as members of the Cooks River Alliance, with funding support from the Australian Government's Urban Rivers and Catchments Program.

The improvements will create more opportunities for people to enjoy the park, be active and connect with nature, while also creating habitat for local wildlife, improving water quality and helping to protect our waterways.

Helping protect the Cooks River

Stormwater from Parry Park flows into Coxs Creek, which connects to the Cooks River and eventually Botany Bay.

When it rains, stormwater can carry litter, sediment and other pollution into our waterways. The new wetlands will help naturally filter and clean stormwater before it flows into Coxs Creek, helping to improve water quality and protect the Cooks River.

More habitat for local wildlife

The project will include more trees, native plants and enhanced landscaping, providing more shade, helping to cool the area and creating habitat for local wildlife.

The new wetlands will also provide habitat for the endangered Green and Golden Bell Frog. Once widespread across south-eastern Australia, the species has experienced significant population declines due to habitat loss and other environmental pressures. The new wetlands at Parry Park will support conservation efforts by providing important breeding and refuge habitat for the species.

Building on the Parry Park Masterplan

The project builds on the community's long-term vision for Parry Park and the Parry Park Masterplan developed by Canterbury-Bankstown Council with community input.

The proposed improvements will create more opportunities for people of all ages to use and enjoy the park. Plans include a new half-court basketball court, improved paths, a viewing platform, enhanced landscaping and other park facilities, creating more places for people to be active, spend time outdoors and connect with nature.

Together, these improvements will help make Parry Park a greener, more welcoming and enjoyable place for the local community.

What happens next?

We're currently finalising the design and asking the community for feedback on the proposed improvements.

Construction is currently expected to start in late 2027 and may take up to two years to complete. We'll keep the community updated as the project progresses.
