18 June 2026

Emergency repair work in your area – Night work expected

We previously let you know that Sydney Water has begun emergency construction work to repair a leaking wastewater pipe beneath Zollner Circuit, Darling Harbour. We are currently working around the clock to complete our repairs.

From Sunday 21 June to Friday 26 June we will be working at night to install steel piles at our excavation site.

What's happening

To safely support the excavation, we need to install steel piles; these are large steel sheets placed into the ground to form a temporary wall around the work area. Due to the size of the equipment and materials, this work must take place at night to minimise disruption to traffic and pedestrians.

What to expect

We know our work can be disruptive, so we'll make every effort to reduce any impact this work may have on you. You may experience:

- Noise from construction activity, when we work at night, we'll aim to do the noisiest work in the early evening to minimise disruptions
- Steel pile installation will be done using a quieter vibration method. Noise is expected, however, this will be quieter than typical construction methods.

Our work hours:

- Night work hours will be 6pm to 6am
- Day work hours will also continue at this time, our normal day work hours are 6am to 6pm.

This work will not interrupt your water or wastewater services.

To find out more about this work, please contact our Community Engagement Team at SouthCommunity@sydneywater.com.au or 1800 006 113 (option 6) during work hours, for afterhours help or emergencies please call 13 20 90.

We apologise for the inconvenience and thank you for your cooperation and patience as we complete this critical work.

Yours sincerely

Shaun Gardner
Operations Leader South
