Refresh Vaucluse Diamond Bay Program

9 November 2026

Completion of electrical work | Intersection of Fitzwilliam Road and Parsley Road, Vaucluse

Sydney Water and its delivery partner Abergeldie Complex Infrastructure (ACI) are constructing a new pump station at Parsley Bay and supporting infrastructure which will redirect untreated wastewater to the Bondi Water Resource Recovery Facility (WRRF).

What's happening

From **Monday, 16 November to Friday, 27 November 2026,** weather permitting, we will be completing electrical work at the intersection of Parsley Road and Fitzwilliam Road. We will be installing high voltage cables at the intersection of Parsley Road and Fitzwilliam Road, as part of finalising the construction of the pump station at Parsley Bay. This work involves excavating a trench, exposing the existing electrical cables and connecting to new cables.

Once this work is complete, all work areas, footpath, grass verge and parking will be reinstated.

Temporary traffic impacts and parking changes

- Parsley Road and Fitzwilliam Road will remain open to traffic during this work, with **two-way traffic** maintained under 'Stop/Slow' traffic control
- approximately 10 parking spaces on the western and eastern side of Parsley Road will be temporarily removed, with **"no parking"** enforced in these areas during the work
- approximately 5 parking spaces on the southern side of Fitzwilliam Road, will be temporarily removed, with **"no parking"** enforced in these areas during the work.

Please see map on the next page showing the work areas and where parking will be temporarily removed. Allow for extra travel time during this period as there will be an increase in construction vehicles and equipment around the work area. To help keep everyone safe, traffic controllers, barriers and signage will be in place to guide vehicles and pedestrians, and protect residents, road users and our work crews.

Equipment

Equipment and machinery used during these works may include a concrete truck, vacuum truck, excavator, drum roller, road saw, construction trucks and utility vehicles.

To minimise impacts

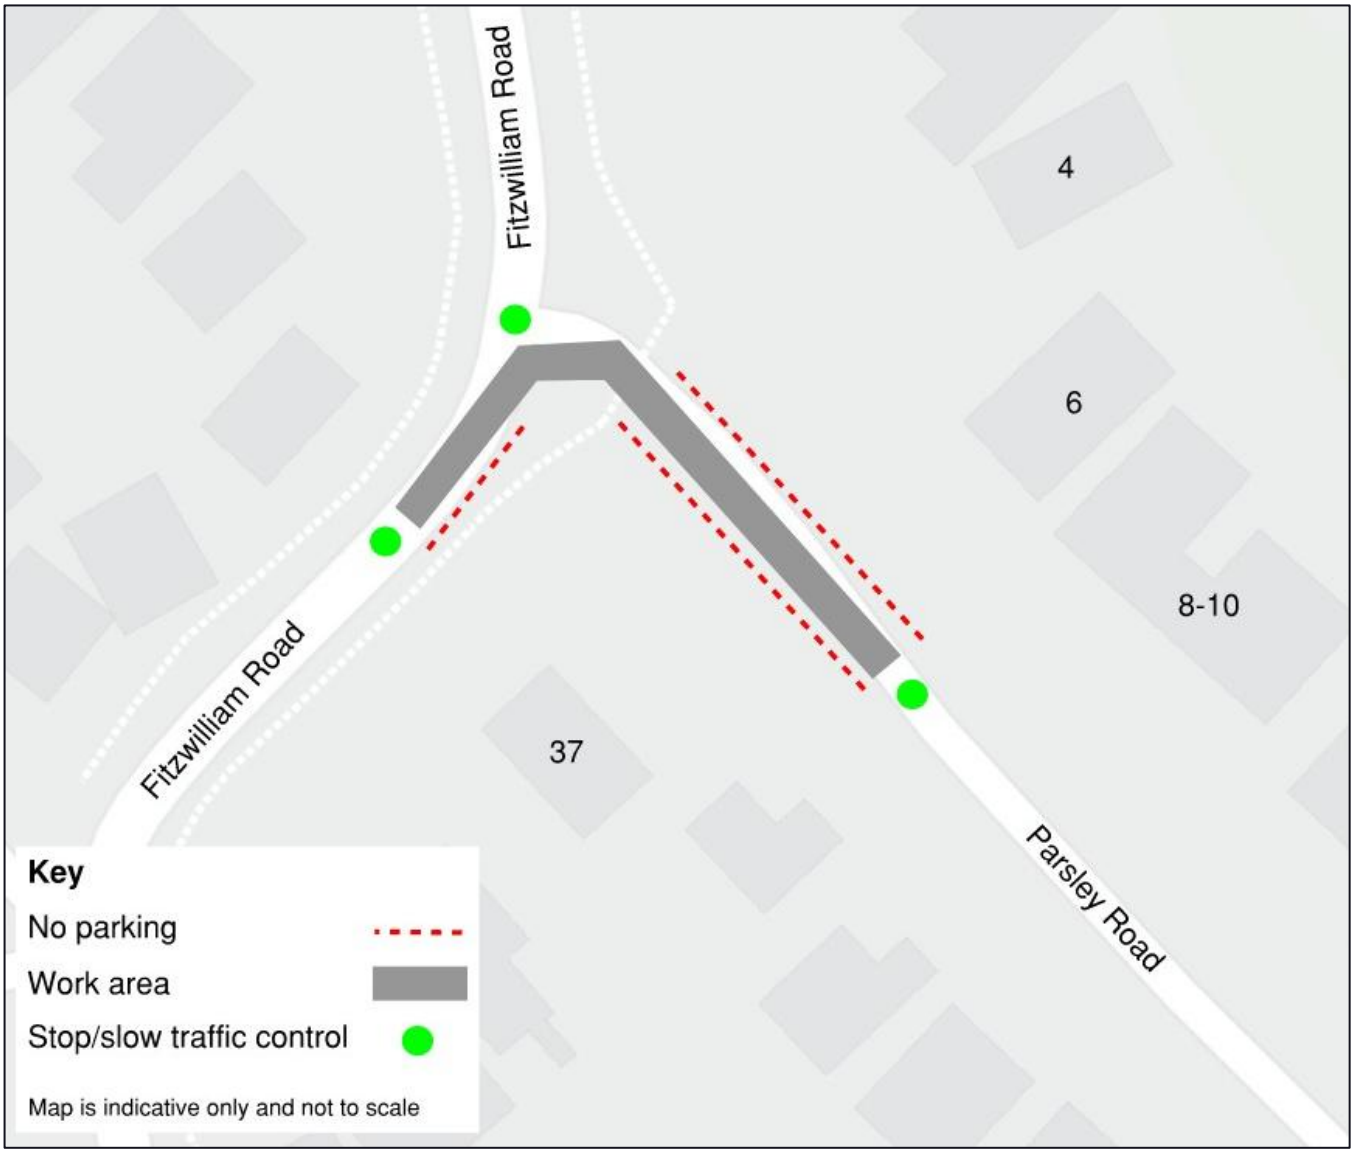

We will use dust suppression techniques, turn off machinery when not in use and have exclusion zones around work areas. Our work may be noisy at times, and we will try to minimise impacts on nearby residents where possible. We sincerely appreciate your patience during our work.
