## Parsley Bay construction activities and traffic impacts | Parsley Road and Fitzwilliam Road

Sydney Water and its delivery partner Abergeldie Complex Infrastructure (ACI) are constructing a new pump station at Parsley Bay and supporting infrastructure which will redirect untreated wastewater from one of the last remaining ocean outfalls and transfer it to the Bondi treatment plant. Under the Refresh Vaucluse Diamond Bay project, we are building new infrastructure to divert the flows from the last three remaining ocean outfalls in Sydney to the Bondi Water Resource Recovery Facility (WRRF).

Further to our notification on 18 December January 2025, the service installation at the intersection of Fitzwilliam Road and Parsley Road will now commence on **27 January 2026**, and it is expected to be completed by **13 February 2026**, weather permitting. The duration of this work is being extended due to ground conditions and construction restraints in the area

We will also be conducting minor excavation and concrete work in our Parsley Bay construction site, and is expected to be completed by **31 March 2026**, weather permitting.

### What's happening in the next few weeks

#### Trenching and service installation on Parsley Road and Fitzwilliam Road

To prepare for the construction of the pump station at Parsley Bay, we will be installing high voltage power cables through existing conduits along Parsley Road and Fitzwilliam Road. This work will involve digging up small sections of the road surface, removing ground materials and installing conduits and cables. We expect some of this work will be noisy and there will be an increase in construction vehicles and equipment around the work area. Once completed, all work areas will be reinstated.

Traffic management will be in place to ensure the safety of our crew, residents and road users.

#### Temporary removal of parking on Parsley Road and Fitzwilliam Road

During cable pulling Parsley Road will **remain open** to traffic. Approximately 10 parking spaces on the western and eastern side of Parsley Road and approximately 5 spaces on Fitzwilliam Road will be **temporarily removed** from **27 January to 13 February 2026**. This will provide safe access to road users and maintain traffic flow during the work. Areas of 'no parking' will be clearly delineated with traffic barriers and signs advising the applicable dates.

A map is provided overleaf which shows work areas and where parking will be removed.

#### Minor excavation and concreting

In preparation for the construction of the new diversion chamber and pump station, we will be carrying out minor excavation, concreting work and the installation of a new maintenance hole in our Parsley Bay construction site.

### Equipment

Equipment and machinery to be used for the work may include

- cable winch
- cable drum stand
- vacuum truck
- excavator
- trucks and utility vehicles.

## To minimise impacts we will be

- turning off machinery when not in use
- installing traffic control on Parsley Road and Fitzwilliam Road.

We understand the ongoing construction can be challenging for residents and we sincerely appreciate your patience during this time.

## Work hours

Our work hours will be from **Monday to Friday, between 7 am to 6 pm** and on **Saturdays between 8 am to 1 pm**. If we need to work outside these hours, we will notify residents in advance.

## Where the work is taking place

## Contact

We will provide regular updates to the community as the work progresses. If you have any questions, please contact our community engagement team on **1800 641 349** or email us on [vauclosediamondbay@sydneywater.com.au](mailto:vauclosediamondbay@sydneywater.com.au).
