Richmond System Wastewater Upgrade project

Night work and temporary traffic changes on Grose Vale Road, North Richmond

As part of the Richmond System Wastewater Upgrade, there will be traffic control on Grose Vale Road while we complete minor rectification work to an existing pit lid.

Traffic control will be in place, and residents will continue to have access to their driveways and private properties during construction.

What's happening

The work involves removing a small section of the asphalt around the existing pit, adjusting the pit lid to the required level and reinstating the asphalt once the work is complete (see map overleaf for details).

When we'll be working

To minimise daytime traffic congestion, work will be carried out on **Wednesday 18 November** between **7:00pm and 5:00am**, weather permitting.

Equipment we will be using

Equipment used will include, jackhammers, excavator, rollers, hand tools, along with support vehicles such as utes and a bobcat.

Minimising noise

Some activities, including asphalt removal and reinstatement may generate noise. We will make every effort to complete noisier activities before 10:00pm to minimise disruption to nearby residents. Quieter activities may continue after this time, as required.

Traffic management

During our work temporary detours and lane closures will be in place. Authorised Traffic Controllers will assist with traffic flow whilst keeping you and our team safe. Please be mindful when walking, cycling or driving near our construction activities and always follow instructions from our traffic management team.

Refer to the electronic signs surrounding the work area for updates to traffic conditions and detours.

We ask residents to park in adjacent streets or other suitable locations prior to the commencement of work.
