Ryde to Pymble pipeline upgrade – Construction starting soon

Sydney Water is bringing the Ryde to Pymble drinking water pipeline back into service and upgrading the connection to Wahroonga Reservoir.

This work will help provide a more reliable water supply and support the growing needs of communities across Sydney's North Shore.

Sydney Water has appointed McConnell Dowell – Gamuda Joint Venture (MDGJV) to deliver the Ryde to Pymble pipeline upgrade project.

Over the next six weeks, we'll carry out final checks along the pipeline route before construction begins. This includes checking ground conditions and locating underground services to help us safely plan the work.

We expect construction along the route to start from late July 2026, weather and site conditions permitting.

Before work starts in your area, we will provide another notification with more information about timing, work locations, traffic changes and any expected impacts.

Project Alignment

What you can expect

We understand that a project of this scale can be disruptive, including impacts on traffic, local businesses, and the environment. We are committed to minimising community disruption, and we'll keep you and key stakeholders informed as we identify solutions and reduce impacts wherever possible.

Traffic management

To keep everyone safe, we'll have traffic management control in place at different locations along the route. This may include temporary:

- single lane closures
- stop/slow traffic control
- changes to parking.

Traffic control will generally be in place between **7:00 am and 6:00 pm**.

Please follow the directions of traffic controllers and allow a little extra travel time, especially during peak periods.

Some on-street parking spaces may be temporarily unavailable while work is underway. We appreciate your understanding as these measures help keep everyone safe.

Bus route changes

Changes to bus routes or bus stop locations may be required during construction. If this occurs, information will be provided by the relevant bus operators before changes take effect.

Where do I get more information and help?
