Ryde to Pymble pipeline upgrade – Compound establishment – Ryde Pump Station, Ryde

To support Sydney’s growing communities, Sydney Water is reinstating the Ryde to Pymble (RP03) water pipeline to strengthen network resilience and support population growth across Sydney’s northern suburb.

To complete this work, our delivery partners McConnell Dowell–Gamuda Joint Venture (MDGJV) will be establishing a compound site at **Ryde Pump Station, Ryde** from **Monday, 22 June 2026** to late **December 2027**, weather permitting.

What you need to know

This site compound will be used to store equipment and materials needed for the construction of RP03. It will also provide site offices, worker amenities, and parking to support nearby construction activities. The compound will be secured with fencing to protect stored materials and equipment. You may notice more trucks travelling to and from the site throughout the day as work is carried out.

Our work hours

Our working hours are between **7am and 6pm Monday to Friday and 8 am to 1pm on Saturdays**. There will be **no work on Sundays or public holidays**. From time to time, we may need to work outside of these hours. We'll make sure to keep you informed ahead of time, so you know what to expect.

Minimising noise and dust

We know our work can be disruptive, and we'll make every effort to reduce any impact this work may have on you. During this time, you may experience some noise and dust from our activities. We'll continue to monitor noise and dust levels and work directly with affected residents to mitigate noise wherever feasible. To minimise noise and dust during our work, we'll put the following measures in place when needed:

- Provide noise barriers and acoustic sheds
- Undertake noisy work during core work hours, where possible
- Ensure all equipment is shut down when not in use and non-tonal reversing beepers used on vehicles
- The use of noise blankets
- Dust suppression methods i.e watering down the site to minimise dust from becoming airborne
- Materials that are prone to generating dust are covered when not in use
- Develop a waste management plan

Where do I get more information?

We're committed to keeping you informed by sending out a weekly email update which will include upcoming work and project updates. If you would like to be added to our email distribution list, please scan the QR code which will direct you to our website where you can subscribe.
