Ryde to Pymble pipeline upgrade

Start of construction on Kissing Point Road between Saddington Street and Auluba Road

Dear Resident,

Sydney Water and our delivery partner, McConnell Dowell–Gamuda Joint Venture, are bringing the Ryde to Pymble drinking water pipeline back into service and upgrading the connection to Wahroonga Reservoir. This essential work will help provide a more reliable water supply and support the growing needs of Sydney's North Shore.

From Monday 9 November 2026, construction and trenching work will take place along Kissing Point Road between Saddington Street and Auluba Road.

This work is expected to continue until early December 2026, weather and ground conditions permitting.

Project alignment

What to expect

We understand constructions can be disruptive and will work to minimise impacts wherever possible. We will keep residents and stakeholder informed throughout the work.

Our working hours will be 7am-6pm Monday to Friday, and 8am-1pm Saturdays. Work will not occur on Sundays or public holidays.

During construction, you may notice:

- noise from trenching and other construction activities
- temporary traffic changes and parking restrictions
- increased construction vehicle movements in the area

As work progresses, we'll provide further notifications and information about the timing, specific work locations, traffic changes, detours and any other upcoming impacts.

Traffic management

To safely carry out this work, we will implement temporary road closures along **Kissing Point Road** between **Saddington Street** and **Auluba Road** while construction is underway. **These closures will be in place 24 hours a day, 7 days a week.**

Where work is not directly in front of your property, you'll be able to access your home outside construction hours, including **before 7am, after 6pm Monday to Friday and on weekends.**

If we need to temporarily restrict access to a property, we'll contact affected residents in advance to discuss arrangements. Access will always remain available for essential services and emergency services. Pedestrian access will also be maintained.

Detours

Information regarding detours will be provided in further notifications and in our weekly email updates. Please subscribe to stay informed of upcoming works and any changes to traffic arrangements.
