

Ryde to Pymble pipeline upgrade – Temporary water connection - Fay Place

Sydney Water and our delivery partner, McConnell Dowell – Gamuda Joint Venture, are bringing the Ryde to Pymble drinking water pipeline back into service and upgrading the connection to Wahroonga Reservoir. This essential work will help provide a more reliable water supply and support the growing needs of Sydney's North Shore.

Upcoming work

As part of our work, we need to install a temporary water connection in Fay Place to supply water to our temporary Abuklea Rd site compound. Work will take place on **Monday 7 September and Tuesday 8 September 2026, from 7am to 6pm.**

The temporary water connection will remain in place until **December 2027**. Your water supply and other utility services will not be affected during this time and while we complete this work.

What you need to know

- **Monday 7 September** – We'll saw cut and excavate across Fay Place to install the temporary water pipe. We'll complete the work in two sections to maintain access throughout the day. Once the pipe is installed, we'll reinstate the road.
- **Tuesday 8 September** – We'll connect the temporary pipe to the existing water connection in the grass area of Fay Place. We'll use an excavator and vacuum truck to complete this work. Once finished, we'll reinstate the grass area.

Traffic control and a **lane closure** will be in place to keep the community safe and maintain access for residents and motorists.

While we complete this work, you may notice increased noise, trucks and workers in the area. We understand this may cause some inconvenience and will do everything we can to minimise impacts. This includes switching off vehicles and equipment when they are not in use and completing noisier activities, such as saw cutting, as quickly as possible.
