Planning for new drinking water pipes in parts of Leppington and Austral

Dear Resident or Business Owner

We are planning to build new drinking water pipes in Leppington and Austral. This new infrastructure will provide clean and reliable drinking water to the local community and will support population and economic growth in the South West Growth Area.

We will carry out environmental and technical investigations over the coming months to help us plan for the new infrastructure.

In early December you may see our team completing site inspections, with workers driving and walking along local streets. Please see the maps over the page for details. Our team will wear high-vis vests and always have photo identification with them.

We may need access to a small number of properties as part of our environmental survey of the area. We will contact affected properties directly. Please note that we will not be working on site over the holiday period between Monday 22 December and Friday 9 January.

We will write to you again next year before we carry out more detailed investigations. Following these investigations and project approvals, we expect construction of the new pipes to start in 2027 and be completed by during 2028. We will keep you updated and give you notice before we start.

For more information, please visit www.sydneywater.com.au/swgadrinkingwater or contact our Community Engagement Team by calling **1800 000 229** or by emailing **SWGAdrinkingwater@sydneywater.com.au**.

Please email us your contact details if you would like to register for future updates. We will continue to provide paper notifications as well.

Yours sincerely,

Fola Ladiran
