

We're working in your area

25 September 2026

We are starting construction of new wastewater infrastructure as part of the Upper South Creek Networks Program, providing world-class wastewater services to Western Sydney's growing communities.

Our work has started in the Badgerys Creek precinct, to deliver around 3.2 km of new wastewater pipes.

What you need to know

The Badgerys Creek wastewater pipeline alignment has been split in two sections:

- Badgerys Creek north – which will connect to the South Creek wastewater pipeline, is being delivered by Bothar Boring & Tunnelling, along Elizabeth Drive and Lawson Road. This work started in August 2026
- Badgerys Creek south – from Lawson Road to the Pitt Street Pumping Station, delivered by Whyte Civil.

Work for Badgerys Creek south is expected to begin in October 2026 and will be completed by mid-2027.

Starting from October, work will include:

- site establishment to set up site offices, facilities, equipment storage and work areas
- clearing of vegetation and installing fencing around work areas
- building temporary access tracks to work site locations
- excavating, compacting and levelling of ground surfaces
- deep excavation works to construct the maintenance holes and enable the activities to install the wastewater pipelines
- using open-trench and micro-tunnelling methodology to install the wastewater pipes

- surveying activities, including using a drone camera above our work areas
- delivery and removal of materials and equipment to and from site, which may include out-of-hours deliveries of oversized plant and equipment.

The map on page 3 shows our work areas.

Our work schedule

Our construction work for Badgerys Creek south will start in **October 2026** and is expected to finish in **mid-2027**, weather and ground conditions permitting.

Standard work hours

Our standard work hours are **7 am to 6 pm, Monday to Friday**, and **8 am to 1 pm on Saturdays**.

We won't work on Sundays or public holidays.

Out-of-hours work

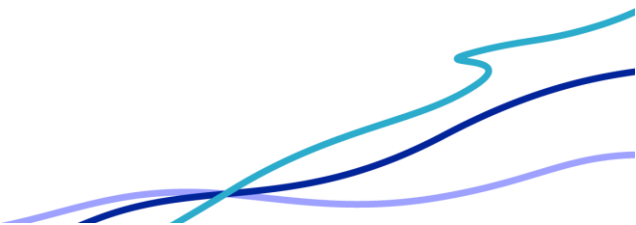

Some work may need to take place outside standard work hours to minimise traffic impacts and maintain the safety of our workers, pedestrians and road users.

This can include, but is not limited to, deliveries of oversized plant and equipment, generator use, repairs to equipment, and site crew and vehicle movements.

Out-of-hours work will be carried out in line with road occupancy licences and permits, and Transport for NSW requirements.

If we need to work outside standard work hours, we'll notify you in advance.

Impact to services

Your water and wastewater services will not be impacted while we do this work.

What you can expect

We know our work can be disruptive, so we'll make every effort to reduce any impact this work may have on you. You may experience:

Noise

At times, there may be some noise from the digging and heavy machinery. We'll keep noise to a minimum, avoid unnecessary loud noises and follow all mitigation measures in the construction environmental management plan.

Truck movements

There will be frequent vehicle movements in and out of our work areas. Truck movements will vary each day depending on the work activity.

When needed, our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic. We'll make sure our workers understand the importance of driving safely and within speed limits.

Dust and mud

Some of our work will create dust which can get worse in windy weather. We'll manage dust by wetting down our work areas, access tracks and stockpiled material. We'll inspect our work areas often to make sure they are tidy and organise a street sweeper to make sure mud is not tracked off site onto local roads.

Restoration

We'll take photos of our work areas before we start so that it's restored as close as possible to its original condition.

We're working closely with impacted landowners to ensure impacts to private property are managed and restored once our work is complete.

We speak your language

If you need a free interpreter, please call 13 14 50

Arabic | Italian | Chinese (Traditional) | Chinese (Simplified) | Spanish | Croatian

إذا كنت بحاجة إلى مترجم، اتصل برقم الهاتف المذكور أعلاه

Se hai bisogno di un interprete, chiama il numero sopra

如果您需要口譯員，請撥打上面列出的電話號碼如果您需要

口译员，请拨打上面列出的电话号码

Si necesita un intérprete, llame al número que figura arriba

Ako trebate prevoditelja, nazovite gornji broj

Where to get more information

If you would like to know more, please contact our Community Engagement team at **uscnetworks@sydneywater.com.au** or call **1800 010 083**.
