

We're working in your area

9 September 2026

We're working on the Upper South Creek Networks Program, providing world-class wastewater services to Western Sydney's growing communities.

In the Cosgroves Creek Stage 1 precinct, we're installing 10.5 kilometres of new wastewater pipelines and associated infrastructure.

What you need to know

From **Wednesday 16 September to Friday 30 October 2026**, our contractor, Vaughan Civil, will be working on **Adams Road between Willmington Road and The Northern Road**.

During standard work hours, we'll undertake site investigations and earthworks along Adams Road. Activities will include:

- setting up traffic management and environmental controls
- installing waterfilled barriers along the verge to provide protection between the live traffic and site crews
- site investigations, which will involve a small excavator and vacuum truck, locating underground services, and using hand tools to take soil samples
- earthworks, including importing soil and compacting activities
- dewatering activities, involving a pump and generator
- movement of plant and light vehicles
- delivery and removal of materials and equipment to and from site, which may include deliveries of plant and equipment.

There will be changed traffic conditions as we work along Adams Road. Traffic changes will include reduced speed limits, lane closures and stop/go traffic control. Motorists may experience short delays and are encouraged to follow directions from traffic controllers.

Standard work hours

Our standard work hours are **7 am to 6 pm Monday to Friday, and 8 am to 1 pm on Saturdays**. We won't work on Sundays or public holidays.

Out-of-hours work

Continuous dewatering activities will need to be undertaken to lower the dam level before earthwork activities can take place.

Out-of-hours dewatering activities will take place from:

- **6 pm to 7 am Monday to Friday**
- **1 pm Saturday to 7 am Monday**

Activities will involve using a pump and generator. We don't expect dewatering activities to be noisy.

The map on the last page of this notification shows our work areas and traffic management on Adams Road.

All work will be undertaken in accordance with the project Environment Protection Licence, Road Occupancy Licences and Transport for NSW requirements.

What you can expect

We know our work can be disruptive, so we'll make every effort to reduce any impact this work may have on you.

There may be some short-term noise and movement of vehicles and equipment while the activities are underway. We'll make every effort to minimise impacts to residents and road users.

You may experience:

Noise

At times, there will be some noise from the digging and heavy machinery. This may include saw cutters and rock breaking machines.

We'll keep noise to a minimum, avoid unnecessary loud noises and follow all mitigation measures in the construction environmental management plan.

Impact to services

Your water and wastewater services **won't** be impacted while we do this work.

Restoration

We'll take photos of our work areas before we start so that it's restored as close as possible to the original condition.

Traffic changes

In our work area, machinery and trucks will take up space on the road. Our traffic controllers will help traffic flow while keeping you safe.

Truck movements

There will be frequent vehicle movements in and out of the site during our working hours. Truck movements will vary each day depending on the work activity. We'll avoid parking our trucks on the street wherever possible.

When needed, our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic.

Dust and mud

Some of our work will create dust. This can get worse in windy weather.

We'll manage dust by wetting down our work areas, access roads and stockpiled material. We'll cover stockpiles when not in use and inspect our work areas often to make sure they are tidy.

We'll organise a street sweeper to make sure mud isn't tracked off our site onto local roads.

Where to get more information

If you would like to know more, please contact our Community Engagement Team at **uscetworks@sydneywater.com.au** or call **1800 010 083**.

If you need to make special arrangements, please reach out to us so we can work with you.
