We're working in your area

27 May 2026

We are building new wastewater mains and pumping stations as part of the Upper South Creek Networks Program to ensure that Western Sydney's growing communities are connected to world-class wastewater services.

Sydney Water and CreekConnect will work together with our contractors to build the new wastewater mains and pumping stations across the Upper South Creek precincts.

Our work to design and deliver the next stage of wastewater infrastructure in the Austral Leppington precinct is going well.

We began survey and visual investigations on private properties in parts of Leppington during April. The next phase involves confirming the location of underground services along parts of Eastwood Road, Heath Road and Riley Road (where new wastewater pipes may be needed).

There will be changed traffic conditions while we do this work.

What you need to know

Upcoming site investigation activities will include:

- scanning for underground services
- non-destructive digging (using water and vacuum systems to identify buried services)
- further topographical survey
- geotechnical investigations.

We will also complete aerial drone filming along the proposed alignment, in line with Civil Aviation Safety Authority guidelines.

Our survey work on private properties is continuing. We will contact property owners in advance of this work happening.

Our work schedule

Our investigations on the roads shown over the page will take place **up to five days between Wednesday 3 June and Friday 12 June 2026**, weather and ground conditions permitting.

Work hours

Our work hours are **7am to 6pm Monday to Friday** and **8am to 1pm** on **Saturdays**.

Our traffic control will set up the lane closures between **9am** and **2.30pm**.

We won't work on Sundays or public holidays. If we need to work outside these hours, we'll notify you in advance.

Traffic changes

Our work areas, machinery and trucks will take up space on the road. Our traffic controllers will implement reduced speed limits, lane closures and stop/go (contra flow) to help traffic flow while keeping you safe.

There may be short delays on Eastwood Road, Heath Road and Riley Road while we do this work in Leppington. We thank you for your patience and understanding.

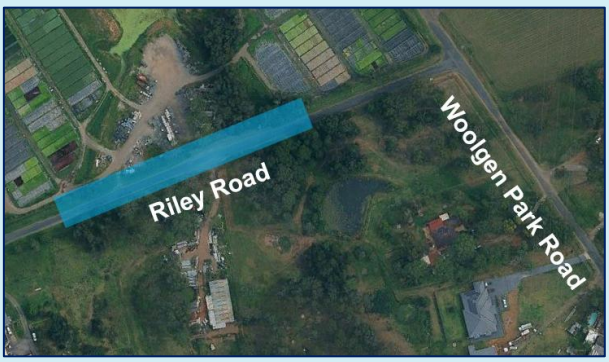

Changed traffic conditions (including temporary lane closure with stop/go traffic control) in place on **Eastwood Road at the intersection of McMann Road**

Changed traffic conditions (including temporary lane closure with stop/go traffic control) in place on **Heath Road near Dickson Road**

Changed traffic conditions (including temporary lane closure with stop/go traffic control) in place on **Riley Road near Woolgen Park Road**

Where to get more information

If you would like to know more, please contact our Community Engagement Team at **uscnetworks@sydneywater.com.au** or call **1800 010 083**.

Sign up for email updates

In addition to updates like this one, we send weekly emails with details about upcoming work and construction impacts. **Send us your email address today to join the mailing list.**

We speak your language

Thank you for your cooperation during this essential work.
