An update about work in your area

3 October 2025

Sydney Water and our delivery partner, CreekConnect, are working together to deliver the Upper South Creek Networks Program to ensure that Western Sydney's growing communities are connected to world-class wastewater services.

Over the next 12 years, we will design and construct wastewater pipelines and pumping stations in stages across the eight Upper South Creek precincts.

We started work in the Cosgroves Creek precinct in **mid-August 2025** and expect to finish in **mid-2027,** weather and ground conditions permitting. This includes construction of the Cosgroves Creek pumping station, gravity carriers and pressure mains.

What you need to know

Quickway are continuing construction of the new Cosgroves Creek pumping station at **546-640 Luddenham Road**, opposite the future Sydney Metro Luddenham Station.

Since mid-August, we have undertaken site establishment work to set up site offices, facilities, stockpile areas and fencing around the new pumping station.

Over the next four months, our work activities will include:

- building a permanent access road off Luddenham Road
- earthworks, including excavations, backfilling and compacting for the temporary and permanent access roads, and future pumping station
- piling work, including drilling, steel fixing, formwork and concrete pours
- delivery and removal of materials and equipment to and from site.

Extended work hours

To ensure the pumping station structure is built safely and to a high quality, we need to extend our work hours to complete continuous concrete pours. The continuous concrete pours will be intermittent between October 2025 and late January 2026.

The Cosgroves Creek pumping station site is located away from residential properties, so we expect construction impacts on the surrounding community to be minimal.

Standard construction hours are:

- **7 am to 6 pm, Monday to Friday**
- **8 am to 1 pm, Saturday.**

Our new extended work hours are:

- **7 am to 8 pm, Monday to Friday**
- **8 am to 6 pm, Saturday and Sunday.**

We won't work on public holidays.

Typically, we will work a 6-day week and only low impact work will be done outside of standard construction hours. We may work on Sundays if we need to complete continuous concrete pours on site.

What you can expect

We know our work can be disruptive, so we will make every effort to reduce any impact this work may have on you. You may experience:

Noise

At times, there may be some noise from the piling, digging and heavy machinery. Please note that noisy work will be completed during standard construction hours and only low impact work will only take place outside of standard construction hours.

We will keep noise to a minimum, avoid unnecessary loud noises and follow all mitigation measures in the construction environmental management plan.

Truck movements

There will be frequent vehicle movements in and out of the site during our work hours. Truck movements will vary each day depending on the work activity.

When needed, our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic. We will make sure our workers understand the importance of driving safely and within speed limits.

Dust and mud

Some of our work will create dust, which can get worse in windy weather.

We will manage dust by wetting down our work areas, access roads and stockpiled material.

We will inspect our work areas often to make sure they are tidy and organise a street sweeper to make sure mud isn't tracked off site onto local roads.

Impact to services

Your water and wastewater services **won't** be impacted while we do this work.

Where to get more information

If you would like to know more, please contact our Community Engagement team at **uscnetworks@sydneywater.com.au** or call **1800 010 083**.
