We're working in your area

29 October 2026

We are building new wastewater pipes and pumping stations as part of the Upper South Creek Networks Program to ensure that western Sydney's growing communities are connected to world-class wastewater services.

Our work is continuing in the Mamre Road precinct, to deliver key wastewater infrastructure, including two new pumping stations, 4.5 km of drinking water pipes, 4.5 kilometres of wastewater pipes and 300 metres of recycled water pipes.

Our survey and site mobilisation activities on Mamre Road between Bakers Lane and Darrabarra Avenue (including at our site compound and Gudyung Close) will continue through to late January 2027.

There will be temporary changed traffic conditions while we do this work.

What you need to know

Upcoming activities along Mamre Road and Gudyung Close will include:

- surveying for underground services, including potholing and CCTV, as well as installing monitoring markers
- installing barriers on and near the roadway
- delivery and mobilisation of equipment to the site compound, including oversized piling rigs and cranes
- vegetation removal along the roadside and verge (only as required)
- driveway adjustments and widening on Gudyung Close, as required
- ongoing water management, including dewatering (this may take place out-of-hours, only as required).

Our work schedule

This work will take place **between Friday 6 November 2026** and **Sunday 31 January 2027** (this will include some out-of-hours work), weather and ground conditions permitting.

We won't work on Sundays or public holidays. If we need to work outside these hours, we'll notify you in advance. Our work will be reduced between **24 December 2026 and 4 January 2027**.

Work hours

Our work hours are **7 am to 6 pm Monday to Friday** and **8 am to 1 pm** on **Saturdays**.

Our traffic control may require lane closures between **9.30 am** and **3.30 pm** on Mamre Road (See Map 1).

We will work extended hours from **7am to 6pm** on **Saturdays** at our two pumping stations (See Maps 1 and 2).

Critical dewatering activity may be required to take place intermittently from **5 am, Monday to Saturday.**

For the safety of our workers and motorists, some work may take place outside of peak travel times, between **7 pm and 5 am.**

Noise

Depending on your location, you may notice intermittent noise from excavators, jack hammers, road saws, rollers, concrete pumps and trucks, as well as noise from light vehicles, site crew and traffic control personnel on foot.

We'll keep noise to a minimum, avoid unnecessary loud noises, install noise blankets where possible, and take steps to minimise impacts on nearby residents and businesses.

Truck movements

There will be frequent vehicle movements in and out of our work areas, including oversized plant and equipment. To reduce disruption, these may take place out-of-hours. Our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic.

Traffic changes

Our work areas, machinery and trucks will take up space on the road. Our traffic controllers will implement reduced speed limits, lane closures and stop/go (contra flow) to help traffic flow while keeping you safe.

There may be short delays on Mamre Road and Gudyung Close while we do this work in Kemps Creek. Other contractors are also working in the area and at the same time.

Please continue to travel with care.

Where to get more information

If you would like to know more, please contact our Community Engagement Team at **uscnetworks@sydneywater.com.au** or call **1800 010 083**.
