We are working in your area

12 August 2026

We are building new wastewater pipes and pumping stations as part of the Upper South Creek Networks Program, connecting western Sydney's growing communities to world-class wastewater services.

Our work is continuing in the Mamre Road precinct to deliver key infrastructure, including two new pumping stations, 4.5 km of drinking water pipes, 4.5 kilometres of wastewater pipes, and 300 metres of recycled water pipes.

We have started surveying, visual investigations and site mobilisation activities on private properties along Mamre Road. During August and September, these activities will be progressing along Mamre Road between Bakers Lane and Darrabarra Avenue (where new wastewater pipes may be needed) as well as near our site compound and pumping stations.

There will be temporary changed traffic conditions while we do this work.

What you need to know

Upcoming activities along Mamre Road will include:

- scanning and surveying for underground services, including potholing, CCTV and settlement monitoring
- installing traffic poles and signage
- laying and levelling road base at our site compound and pumping stations
- vegetation removal along the roadside and verge (only as required).

We will use excavators and vacuum (sucker) trucks to confirm the location of underground services. We will also use road saws, rollers, trucks, generators and lighting towers as part of our work.

Our work schedule

Our investigations and site activities along the roads shown over the page will take place **8 nights between Wednesday 19 August and Wednesday 9 September**, weather and ground conditions permitting. We will not work more than 2 consecutive nights in each location.

Work hours

Our standard work hours are **7 am to 6 pm Monday to Friday** and **8 am to 1 pm** on **Saturdays**.

Our traffic control may require lane closures between **9.30 am** and **3.30 pm**.

For the safety of our workers and motorists, some work may take place outside of peak travels times at nighttime, **between 7 pm and 5 am**. We will aim to minimise out of hours work as much as possible.

We won't work on public holidays. If we need to work outside these hours, we'll notify you in advance.

Truck movements

There will be frequent vehicle movements in and out of our work areas, including oversized plant and equipment. To reduce disruption, these may take place out-of-hours. Our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic.

Work areas and changed traffic conditions on Mamre Road near our site compound and pumping stations between Bakers Lane and Darrabarra Avenue.

Work areas and changed traffic conditions on Mamre Road near the intersection of Abbotts Road.

Traffic changes

Our work areas, machinery and trucks will take up space on the road. Our traffic controllers will implement reduced speed limits, lane closures and stop/go (contra flow) to help traffic flow while keeping you safe.

There may be short delays on Mamre Road while we do this work in Kemps Creek. Other contractors are also working in the area. Please continue to travel with care.

We thank you for your patience and understanding.

Thank you for your cooperation during this essential work.

Traffic changes along Mamre Road 19 August to 9 September 2026
