Upcoming work in your area

29 January 2026

We are starting construction on the next stage of work on the Upper South Creek Networks Program, providing world-class wastewater services to Western Sydney's growing communities.

Our work is continuing in the Cosgroves Creek Stage 1 precinct, to deliver key wastewater infrastructure, including a new pumping station and 10.5 km of new wastewater pipelines.

What you need to know

We have engaged **Eire Construction** to start construction of the new Cosgroves Creek North wastewater pipeline along Luddenham Road (north of the M12 Motorway).

We have also engaged **Vaughan Civil** to start construction of the new Cosgroves Creek South wastewater pipeline along Luddenham Road (south of M12 Motorway), Elizabeth Drive and Adams Road.

Starting in early February, the initial six months of work will include:

- site establishment to set up site offices, facilities, laydown and work areas
- clearing of vegetation and installing fencing around work areas
- building the temporary access tracks to maintenance hole locations
- excavating, compacting and levelling of ground surfaces
- deep excavation works to construct the maintenance holes
- open-trenching excavations, to dig the trench and lay pipes
- using underground drilling machines to install the wastewater pipes
- surveying activities, including using a drone camera above our work areas
- delivery and removal of materials and equipment to and from site, which may include out-of-hours deliveries of oversized plant and equipment.

The map on page 3 shows our work areas.

Update on Cosgroves Creek pumping station

Quickway started early work on the Cosgroves Creek pumping station in August 2025. Upcoming work activities include:

- construction of a new access road, including excavation, delivery of materials and compacting road base
- installation of maintenance holes and pipes
- excavation work for the underground structures
- using sprayed concrete (shotcrete) for the underground structures
- installation of fencing.

Our work schedule

Eire Construction will start work on the Cosgroves Creek North gravity carrier in **early February 2026** and scheduled to finish in **October 2026**, weather and ground conditions permitting.

Vaughan Civil will start work on the Cosgroves Creek South gravity carrier in **early February 2026** and scheduled to finish in **November 2026**, weather and ground conditions permitting.

Construction of the Cosgroves Creek Stage 1 pumping station and wastewater pipeline is expected to be completed by **March 2027.**

Standard work hours

Our standard work hours are **7 am to 6 pm**, **Monday to Friday,** and **8 am to 1 pm** on **Saturdays.**

We won't work on Sundays or public holidays.

If we need to work outside these hours, we will notify you in advance.

What you can expect

We know our work can be disruptive, so we will make every effort to reduce any impact this work may have on you. You may experience:

Noise

At times, there may be some noise from the digging and heavy machinery. We will keep noise to a minimum, avoid unnecessary loud noises and follow all mitigation measures in the construction environmental management plan.

Truck movements

There will be frequent vehicle movements in and out of our work areas. Truck movements will vary each day depending on the work activity.

When needed, our traffic controllers will help keep traffic flowing safely and minimise disruption to local traffic. We will make sure our workers understand the importance of driving safely and within speed limits.

Dust and mud

Some of our work will create dust, which can get worse in windy weather. We will manage dust by wetting down our work areas, access tracks and stockpiled material. We will inspect our work areas often to make sure they are tidy and organise a street sweeper to make sure mud is not tracked off site onto local roads.

Impact to services

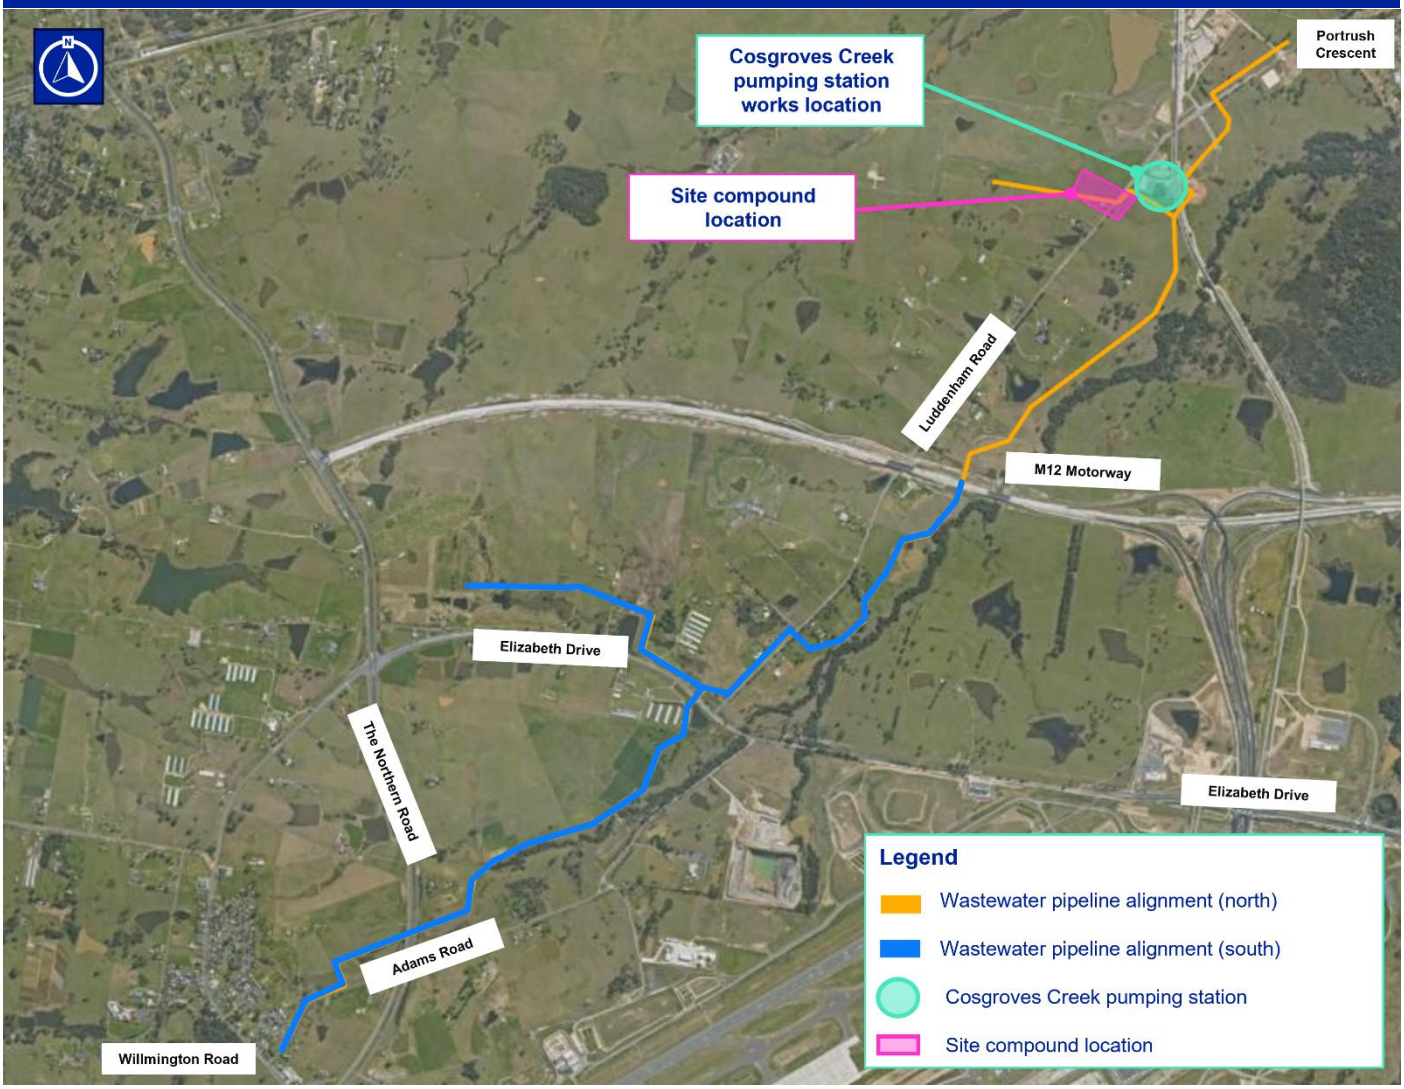

Your water and wastewater services will not be impacted while we do this work.

Restoration

We will take photos of our work areas before we start so that it is restored as close as possible to the original condition.

We are working closely with impacted landowners to ensure impacts to private property are managed effectively and impacted areas are restored once our work is complete.

Cosgroves Creek Stage 1 precinct – our work area

We speak your language

If you need a free interpreter, please call 13 14 50

Arabic | Italian | Chinese (Traditional) | Chinese (Simplified) | Spanish | Croatian

إذا كنت بحاجة إلى مترجم، اتصل برقم الهاتف المذكور أعلاه

Se hai bisogno di un interprete, chiama il numero sopra

如果您需要口譯員，請撥打上面列出的電話號碼如果您需要

口译员,请拨打上面列出的电话号码

Si necesita un intérprete, llame al número que figura arriba

Ako trebate prevoditelja, nazovite gornji broj

Where to get more information
