

Upcoming work at Boddington Way

We're extending our wastewater network to the Cleveland Development Area, enabling new communities to grow.

Sydney Water's South Region Delivery team, D4C, will deliver this work.

Overview of our work

We're installing a new underground pipeline to provide wastewater to the 4,500 new homes expected to be built in the Cleveland Development Area.

This pipeline will run from Fairwater Drive to Bong Bong Road and will be installed using Horizontal Directional Drilling (HDD) and trenching.

Boddington Way

The corner of Boddington Way and Fairwater Drive marks the start of the section of pipeline that we will install using HDD technology.

The benefit of HDD is that most of our work occurs underground. However, we do need to dig two pits – one at the start of the pipeline ('entry pit') and one at the end ('exit pit').

The entry pit for this pipeline will be in the grassed area on the corner of Boddington Way and Fairwater Drive (please see map overleaf).

What you need to know

We plan to start work on corner of Boddington Way on **Tuesday, 27 February** and expect to be complete by **late April**.

Our work hours are **7 am to 6 pm Monday to Friday**. While we do not plan to work weekends, we are approved to work on Saturdays 8 am - 1 pm. We will write to you again if this occurs.

This work will **not** impact your water or wastewater services.

What to expect?

Noise

There will be some noise from our digging and from the drilling machinery on site.

This noise will be limited to our work hours.

Traffic and parking

Our work will take up space on the road.

While we will do our best to limit impact to parking in the area, our crews do need their utes and tools to be close to their work area.

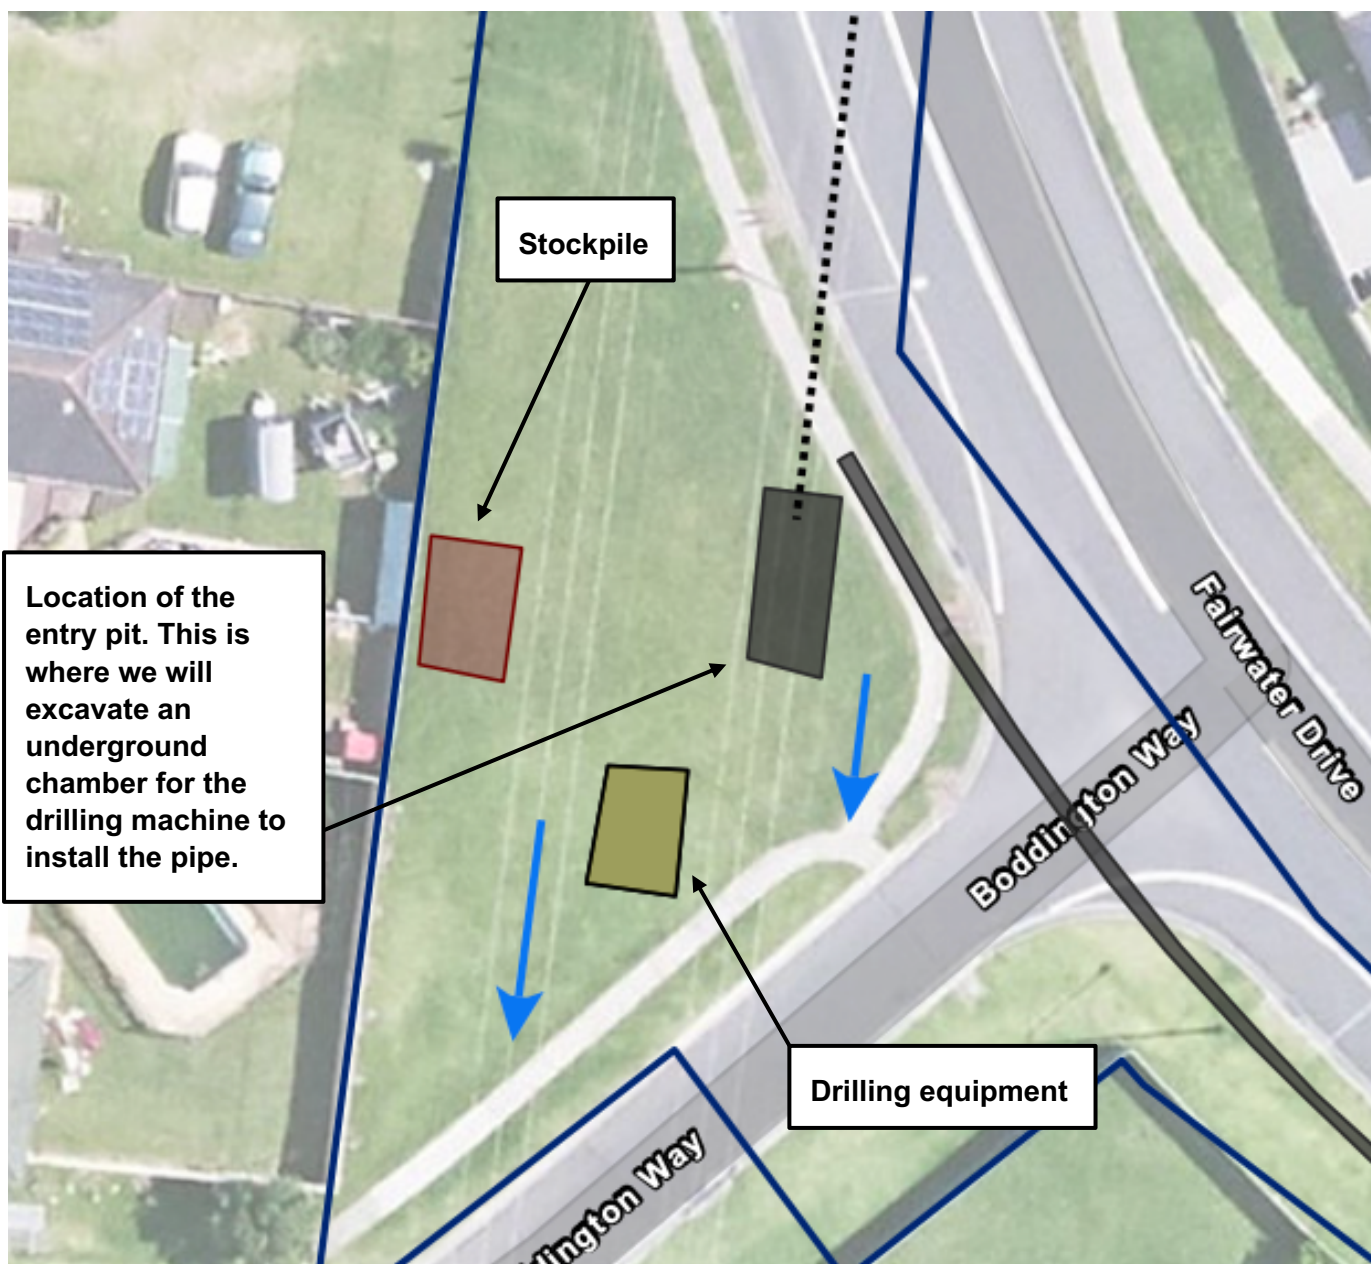

Our traffic controllers will help keep the traffic flowing while keeping you safe.

There will be no pedestrian or bicycle access near our work, with all traffic safely detoured on the other side of the road.

Restoration

When we have completed installing the pipeline we will restore the grassed area.

Roadway impacted by our work will be temporarily restored. We will write to you again before we permanently restore Fairwater Drive.

Who can I talk to about this project?

For questions or more information, please email Delivering4Customers@sydneywater.com.au or call us on 1800 006 113 (option 8).

We will continue to keep the community updated as the project progresses.
