

Upcoming work in Horsley

We're extending our wastewater network to the Cleveland Development Area, enabling new communities to grow.

Sydney Water's South Region Delivery team, D4C, will deliver this work.

Overview of our work

We're providing new wastewater services to the 4,500 new homes expected to be built in the Cleveland Development Area.

These homes will bring new communities to live, grow and thrive in the beautiful Illawarra.

To support this new development, we'll be extending the underground wastewater network from Horsley to Cleveland, as well as upgrade the pumping station on the corner of Fairwater Drive and Riverpark Way, Horsley.

Our work will involve installing two new wastewater pipelines.

One pipeline will run from the pumping station on **Fairwater Drive** and continue to **Bong Bong Road**.

The other will be built across farmland just off **Stockyard Crescent** in Horsley to **Cleveland Road**, Cleveland.

Please see the map overleaf to see the location of this new infrastructure.

What you need to know

We plan to start work on **4 March 2024** and expect to be complete by **early September**. We'll continue to update you during this time.

The upgrade of the pumping station will commence once we have installed the new pipelines.

Our work hours: **7am to 6pm Monday to Friday**.

This work will **not** impact your water or wastewater services.

What to expect?

We acknowledge that our work may be noisy and disruptive from time to time, with an increase in vehicle movements, noise, and dust around work areas. The South Region Delivery Team will reduce these impacts as much as practicable while aiming to finish the project as quickly as we can. You may experience:

Noise

There will be some noise from the digging and machinery on site.

Please note our trenching work will move along as the new pipelines are being installed. This means we won't be impacting the same location for very long.

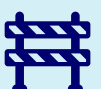

Traffic and detours

Our work will take up space on the road. For the duration of our work, there will be traffic changes on Bong Bong Road, Cleveland Road, Fairwater Drive and surrounding streets.

Our traffic controllers will help keep the traffic flowing while keeping you safe.

Pipe stringing

We will need to weld the pipe into long strings before installing them.

Please see map overleaf for this location.

 Pipeline 1 will be installed using two construction methods – trenching and horizontal directional drilling (HDD), which means we will drill the pipe into place underground.

 Pipeline 2 will mostly be trenched, however, small sections will be drilled to avoid sensitive environmental areas.

Who can I talk to about this project?

For questions or more information, please email Delivering4Customers@sydneywater.com.au or call us on 1800 006 113 (option 8).

We will continue to keep the community updated as the project progresses.
