

Community Update

October 2025

Sydney Water is building new infrastructure to support housing and economic growth in the Wilton area.

This work will deliver new drinking water, recycled water and wastewater assets to ensure a resilient and reliable water supply for the Wilton community, whilst protecting their local environment.

Sydney Water/Acciona Site Office - 150 Condell Park Road

In July 2025, Sydney Water and its delivery partner, Acciona, opened a new site office at **150 Condell Park Road** to support the successful delivery of these new assets.

The new site office features a Community Drop-in Centre for local residents who may have questions or require further information.

The Drop-in Centre is open from **Monday to Friday, between 9am and 3pm**, excluding public holidays.

Community information day

Sydney Water and Acciona are hosting another community drop-in session on **Saturday 8 November 9am-12pm** for those wanting to learn more about our work and how it may impact their local community.

A children's face-painter will be available on the day. We will be located opposite Wilton Plaza on the corner of Greenbridge Drive and Pembroke Parade.

Work hours (standard & holiday)

Standard works hours are Monday to Friday 7 am to 6 pm, and Saturday 8 am to 1 pm. Usually, no work will occur on Sundays or public holidays.

The site office on Condell Park Road and all construction activity will shut down for the holiday break from **Friday 19 December 2025, returning Monday 5 January 2026**.

If you see a site that has been compromised during this time, e.g. fallen fences, please contact the community team on **1800 678 098**.

Construction update

Wastewater pump station and pipelines

In August 2025, construction began on the first wastewater pump station in North Wilton. See image (right) showing construction in progress.

We've also started work on the pipelines that will connect to the first pump station by excavating an area beneath the Hume Highway using under bore technology.

In November 2025 we will begin construction of the second wastewater pump station, which will be located next to the existing Sydney Water facility on Condell Park Road.

Drinking water reservoirs

Recycled and drinking water reservoirs will be constructed at the rear of 1160 Picton Road, Wilton. We have started preparing the site for construction, which will take around 18 months to finish. From November we will be working on the driveway entrance onto Picton Road (opposite Almond Street).

Drinking and recycled water pipelines

In late October, we will begin installing new pipelines from the rear of the Wilton Greens estate towards the new reservoir location. These pipelines will follow Picton Road and extend through Argyle, Almond, Hornby, and Hornby Street West. To facilitate this work, some road sections will be closed at different times with detours in place.

We will also install new drinking water pipelines along two segments of Wilton Road. Installation of these pipelines will use a combination of bore technology and open cut trenching. Detours will not be required, however, partial lane closures and traffic control will be in place.

Construction in progress – North Wilton wastewater pump station

Wilton Water Resource Recovery Facility (WRRF)

Contract award for the contractor who will undertake the interim upgrade of Wilton WRRF is expected in the coming weeks with construction due to commence before Christmas.

Separately, contract award for the permanent WRRF is expected around mid-2026.

Reducing our impact on your community

Minimising the impact of our work on the local community is a high priority for Sydney Water. While there will be times when our construction activities may create noise, dust, and other impacts, we will try to minimise them by:

- installing noise barriers where necessary
- minimising dust by using water carts
- turning off vehicles and equipment when not in use
- working with residents to ensure property access is maintained at all times
- working during standard hours.
