Extended work hours to complete pipeline construction - Between Argyle Street and Picton Road, Wilton

Thank you for your patience as Sydney Water builds new water, wastewater, and recycled water infrastructure, to service growing communities in the Wilton area.

As part of this work, Sydney Water's contractor, Athassel Civil, has been constructing new drinking water and recycled water pipelines from the southern side of Picton Road to Argyle Street, Wilton.

The pipeline has been installed using both trenchless underground construction and open trench methods - by boring underneath Picton Road to minimise surface disruption, with open trench excavation through Crown Land along Camden Street to Argyle Street.

We are now in the final stages of completing this work. Once the work is finished, the area will be restored and replanted to meet environmental requirements.

About our upcoming work

For the next phase of constructing this pipeline, we will be completing a large concrete pour to encase the end section of the pipeline in the Crown Land corridor.

Due to the scale and complexity of this activity, the concrete needs to be poured continuously in one shift. For this reason, we need to work extended hours for one day only.

We are planning to complete this essential work on Friday, 8 May 2026.

Our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.
However, our extended hours for this one day of work will be 3.30am to 6.00pm.

This work will involve:

- setting up the work area, including lighting and safety and environmental controls
- multiple concrete truck deliveries
- using machinery to pour and lay concrete around the pipelines
- use of low powered equipment and hand tools, and packing up the work site under lighting.

Concrete trucks will travel to our work site in the Crown Land reserve from Picton Road, via our existing site compound entrance in Almond Street. The map of our work area and truck route is provided on the next page.

Unfortunately, we won't be able to complete our work if rain prevents the concrete pour from proceeding safely. If we need to reschedule, we will contact Council and nearby residents again with updated details before work recommences.

Minimising our impact on you

We understand extended work hours can be disruptive and are committed to minimising impacts of our activities on the local community. We will make every effort to minimise disturbance our work may have on you by:

- limiting our higher-noise activities to standard daytime working hours where possible
- directing lighting towards the work site and away from nearby homes
- positioning machinery away from residential properties where possible
- using water sprays to manage dust
- sweeping roads and washing truck wheels to reduce mud and soil tracking
- not running motors and equipment unnecessarily
- using traffic and pedestrian management controls to maintain safety and traffic flow around the work area.

Appropriate safety and environmental controls will be in place at all times. This work will not disrupt your water or wastewater services.

More information

If you have any questions or want to learn more about our work, please contact our Community Engagement Team:

- **Call:** 1800 678 098
