Night work and extended working hours
Wastewater pumping station construction – Condell Park Road, Wilton

Thank you for your continued patience and understanding as Sydney Water builds new drinking water, recycled water and wastewater infrastructure, to service growing communities in the Wilton area.

As part of this work, Sydney Water's contractor, Killard Group, is constructing a new wastewater pumping station at the end of Condell Park Road, near the existing Wilton Water Resource Recovery Facility.

Construction of the new pumping station is progressing well. Our next step is to install the electrical connections between the new pumping station and the existing water resource recovery facility.

About our upcoming work

As part of this next step of the work, Endeavour Energy will need to temporarily disconnect power to the Wilton Water Resource Recovery Facility while the electrical connections are being completed. The map of our work areas is provided on the next page.

Our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.

However, due to the scale of the electrical work required, we need to complete this work at night and during extended working hours.

This will help ensure the Wilton Water Resource Recovery Facility continues to operate effectively and provide a reliable service to the community during the work.

We are planning to complete this essential work in three phases:

- **Phase 1 – From 6pm Monday, 12 October to 7am Tuesday, 13 October 2026.**
- **Phase 2 – From 6pm Tuesday, 20 October to 7am Wednesday, 21 October 2026.**
- **Phase 3 – From 6pm to 10pm on Wednesday, 21 October 2026.**

The work will involve:

- setting up the work areas including lighting, safety and environmental controls
- using generators to keep the Wilton facility operating during the electrical work
- crews continually monitoring the equipment and refuelling generators from onsite fuel storage
- reconnecting and testing the new electrical connections.

Minimising our impact on you

We understand that night work and extended working hours can be disruptive, and are committed to minimising the impacts of our work on local residents.

We will make every effort to minimise any disturbance our work may have on you by:

- directing lighting towards the work areas and away from nearby homes
- surrounding generators with noise-reducing blankets
- not running motors and equipment unnecessarily
- completing higher-noise activities earlier in the evening, where possible
- limiting access to the work areas via Condell Park Road to light vehicles only.

Appropriate safety and environmental controls will be in place at all times.

This work is not expected to interrupt the power supply to your property.
If this changes, Endeavour Energy will contact you directly to provide details about any planned power outage.
