18 March 2026

Extended work hours to construct new wastewater pumping station - Condell Park Road, Wilton

Thank you for your patience as Sydney Water builds new water, wastewater, and recycled water infrastructure, to service growing communities in the Wilton area.

As part of this work, Sydney Water's contractor, Killard Group, is constructing a new wastewater pumping station at the end of Condell Park Road, next to the existing Wilton Water Resource Recovery Facility.

For the next phase of this work, we will be completing a large concrete pour for the new pumping station's foundations. Due to the scale and technical requirements for this activity, we need to work extended hours to ensure the concrete is poured in one continuous shift.

About our work

We are planning to complete this essential work on 1 day between Wednesday, 25 March and Tuesday, 31 March 2026. Our work will be scheduled between Monday and Saturday, though the specific day chosen for this activity will be subject to weather and ground conditions.

Our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.
However, our extended hours for this 1 day of work will be 6am to 9pm.

To minimise disruption to residents, we are planning to complete the noisiest construction activities during standard working hours. The work will be completed in parts:

- **Part 1 - 6am to 7am**
  Set up of the work area and installation of safety and environmental controls.
- **Part 2 - 7am to 6pm**
  Delivery of construction materials and concrete and pouring the concrete foundations.
- **Part 3 - 6pm to 9pm**
  Use of low powered equipment and hand tools under lights and packing up the work site.

Unfortunately, we won't be able to complete our work if it is raining during the planned work period and will need to reschedule our activities. If we need to postpone our work, we will contact Council and residents again to provide details about our plans to complete the work before it starts.

What to expect

- During the work, you may notice an increase in vehicle movements, noise and dust
  – we will need to use a lighting generator at the end of the day, and there will be trucks and other construction equipment with reversing beepers working in the area.
- Street parking will be temporarily restricted near our work area to allow for site set-up and access
  – help us complete our work by keeping these sections of the street clear of parked vehicles.

Minimising our impacts on you

We are committed to minimising the impact of our work on the local community. We will make every effort to minimise disturbance our work may have on you by:

- limiting our high noise activities to daytime standard working hours when possible
- positioning machinery away from residential properties where possible
- using water spray to manage dust suppression
- sweeping roads and washing truck wheels to minimise tracking of mud and soil
- not running motors and equipment unnecessarily
- keeping vehicle movements to a minimum
- only using flood lights when it is dark or if there is low visibility
- pointing lights at the work site and away from homes
- using traffic and pedestrian management controls to safely maintain traffic flow and ensure public safety around the work area.

Appropriate safety and environmental controls will be in place at all times. Our work will not disrupt your water or wastewater service.

Managing construction traffic in your neighbourhood

We acknowledge that our work has created an increase in traffic through nearby residential streets. We are continuing to investigate alternative options for accessing our work sites from Stirling Drive and Picton Road, and will keep residents informed as our investigations progress.

As our work continues, we are committed to managing construction traffic from our activities and have:

- implemented speed limit signage
- highlighted speed limit requirements at daily toolbox talks with all staff and contractors
- coordinated our work activities to reduce daily truck and vehicle movements.
