12 October 2026

Update about our work in your area – Condell Park Road, Wilton

Thank you for your continued patience and understanding as Sydney Water delivers new drinking water, recycled water and wastewater infrastructure to service growing communities in the Wilton area.

We understand some residents continue to have concerns about traffic, noise, dust and construction activity in the area. Thank you to everyone who has shared feedback with us. We are listening and continue to look for ways to reduce these impacts wherever possible, while delivering this essential infrastructure.

Our work is continuing and progressing well at each of the construction sites in your area at the end of Condell Park Road. The map of our work areas is provided on the last page.

- **Construction site 2**
  – Located through rural properties between Condell Park Road and Picton Road

  Restoration of the disturbed areas on this work site, and adjoining rural properties, is progressing.

  Our contractor, Vaughan Infrastructure, is expected to complete all restoration work and leave the site at the end of October 2026, weather permitting.

- **Construction sites 3 and 4**
  – Located next to the current Wilton Water Resource Recovery Facility site

  Our contractor, Haslin Constructions, is now set up on site and construction has begun on the new Water Resource Recovery Facility.

  To help deliver this work as efficiently as possible and reduce the overall duration of construction impacts on local residents, we will need to work extended hours during the daylight-saving period when required.

  Our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.

  Extended work hours will only be used by crews working on the new Wilton Water Resource Recovery Facility when required between **Saturday, 17 October 2026 and Saturday, 3 April 2027.**

  The extended working hours will be:

  - **Monday to Friday - 6am to 6pm**
  - **Saturday - 7am to 6pm**

  There will be no work on Sundays or Public Holidays.

  Wherever possible, lower-impact activities will be scheduled during extended work hours to minimise disruption on nearby residents.

  However, large concrete pours will be required as part of construction of the new Wilton Water Resource Recovery Facility. To support this work, there will occasionally be early morning concrete deliveries to the site from 6am on weekdays during the extended work hours period. We will make every effort to minimise disruption to nearby residents during these activities.

Sydney Water Corporation ABN 49 776 225 038

What to expect

As our activities progress, you may continue to notice heavy truck movements, noise and dust.

- There will be trucks and other construction equipment with reversing beepers driving through and working in the area.
- Generators will be used in areas of the new Water Resource Recovery Facility.
- Street sweeping and road washing vehicles will be travelling regularly through Sutton Crescent, Berrima Road and Condell Park Road (if required).

Minimising our impacts on you

We understand that our work in your area can be disruptive, and we are committed to minimising the impacts of our work on the local community.

In response to community feedback, we have:

- increased street sweeping and road washing activities
- continued dust suppression measures across our work sites
- reinforced safe driving requirements with contractors
- continued investigating alternative access routes to reduce heavy vehicle movements through local streets.

We will continue to make every effort to minimise any disturbance our work may have on you by:

- assessing and managing environmental controls on work sites, by using water spray to manage dust suppression and washing truck wheels to minimise mud tracking before they leave a site
- regularly maintaining local roads with street sweepers and high-pressure water cleaning
- positioning machinery away from residential properties where possible and not running motors and equipment unnecessarily
- completing higher-noise activities during standard work hours, where possible
- surrounding generators with noise-reducing blankets during extended work hours
- scheduling delivery of large equipment and materials to work sites outside peak morning and afternoon periods where practicable
- advising all construction teams and contractors to be respectful of the local community by driving safely through Bingara Gorge when travelling to work sites
- using electronic message boards to display a reduced 40km/h speed zone along Condell Park Road, to help maintain safety for local residents.

Appropriate safety and environmental controls will be in place at all times. We will continue to notify you in advance of any planned water or wastewater supply interruptions.

Update of alternate access routes to our work sites

We recognise that traffic and heavy vehicle movements remain a concern for many residents.

As previously advised, Sydney Water has been investigating alternative access routes to reduce construction traffic through local streets.

Sydney Water continues to investigate alternative access options with Transport for NSW and other stakeholders and will keep residents informed as these investigations progress.

Map of our work areas

- Sydney Water project office – 150 Condell Park Road
- Construction site 1 – New wastewater pumping station site
- Construction site 2 – New pipelines construction site
- Construction site 3 – Haslin Constructions work site compound
- Construction site 4 – New Wilton Water Resource Recovery Facility site
- Existing Wilton Water Resource Recovery Facility

More information

If you have any questions or want to learn more about this work, please contact our Community Engagement Team:

- **Email:** wiltonnewtown@sydneywater.com.au
- **Visit:** sydneywater.com.au/wilton-new-town

You are also welcome to visit us at our community drop-in centre at 150 Condell Park Road, Wilton.

We appreciate the patience and understanding shown by local residents during our construction activities. We remain committed to keeping you informed, listening to your feedback and working closely with the community to minimise construction impacts wherever possible - while delivering the essential infrastructure needed to support Wilton's future growth.

Yours sincerely,

Soheil Saemian
