7 September 2026

Update about our work in your area – Condell Park Road, Wilton

Thank you for your continued patience and understanding as Sydney Water delivers new drinking water, recycled water and wastewater infrastructure to service growing communities in the Wilton area.

We understand some residents have concerns about increased traffic, noise, dust and construction activity in the area. Thank you to everyone who has shared feedback with us. We are listening and continue to look for ways to reduce these impacts wherever possible, while delivering this essential infrastructure.

Since our previous update in April 2026, we have made significant progress towards completing the different packages of work as part of the Wilton Integrated Servicing Program.

Our work is continuing at each of the four construction sites in your area at the end of Condell Park Road. The map of our work areas is provided on the last page.

1. **Construction site 1 – Located next to the entrance to Sydney Water's project office**
   Construction of the new wastewater pumping station is progressing well and is currently on schedule to be completed by mid-2027. Excavation work has been completed and construction of the pumping station components are underway – including electrical connections and testing.

2. **Construction site 2 – Located through rural properties between Condell Park Road and Picton Road**
   Our contractor, Vaughan Infrastructure, has installed new drinking water and recycled water pipelines that will service new communities around Bingara Gorge. Testing of the new pipelines and restoration of adjoining rural properties is underway.

   Our contractor is planning to leave the site at the end of 2026. This includes removing stockpiles of soil and other materials, as well as reseeding the work area so that the site is left in a safe and environmentally stable condition.

   Further work will be required on this site to construct a new wastewater pipeline, which will connect to the new wastewater pumping station. Planning for this important infrastructure is continuing. We will keep you informed and provide more information about the timing of this work before construction of the new wastewater pipeline begins on this site.

3. **Construction sites 3 and 4 – Located within the Wilton Water Resource Recovery Facility (WRRF) site**
   Our contractor, Haslin Constructions, is currently establishing their work site compound (Site 3) next to the existing Sydney Water project office at 150 Condell Park Road.

   Construction of the new WRRF (Site 4) that adjoins the existing facility is due to begin in September 2026. Construction of the new WRRF is expected to be completed in early 2028, weather permitting.

About our work

Our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.

To help ensure these packages of work are delivered to schedule and to reduce the duration of construction impacts on local residents, there may be times when we need to work extended hours on weekdays and Saturdays. If we need to work extended hours, we will contact you to provide further details before work starts.

What to expect

- As our activities progress, you may continue to notice heavy truck movements, noise and dust.
  - There will be trucks and other construction equipment with reversing beepers driving through and working in the area.
  - Drones will be used to map, record and take photos to document our work areas.
  - Street sweeping and road washing vehicles will be travelling regularly through Sutton Crescent, Berrima Road and Condell Park Road.
- Temporary traffic and pedestrian changes will be required during the work.
  - Part road closures may be required at various times.
  - Traffic controls will be used to help vehicles and pedestrians move safely through the work area.
  - Traffic signage will be clearly visible to motorists and pedestrians approaching the work area to help keep everyone safe.
- Construction teams and surveyors will be working in the area to inspect and mark-up locations of underground services in roadways, footpaths and road verges.
  - Please be aware of our teams in high visibility safety clothing as you drive through the area.

Minimising our impacts on you

We understand that our work in your area can be disruptive and are committed to minimising the impacts of our work on the local community.

In response to community feedback, we have increased street sweeping and road washing activities, continued dust suppression measures on work sites, reinforced safe driving requirements with contractors, and are investigating alternative access routes to reduce heavy vehicle movements through local streets.

We will make every effort to minimise any disturbance our work may have on you by:

- assessing and managing environmental controls on work sites, by using water spray to manage dust suppression and washing truck wheels to minimise mud tracking before they leave a site
- regularly maintaining local roads with street sweepers and high-pressure water cleaning
- positioning machinery away from residential properties where possible and not running motors and equipment unnecessarily
- scheduling delivery of large equipment and materials to work sites outside peak morning and afternoon periods
- advising all construction teams and contractors to be respectful of the local community by driving safely through Bingara Gorge when travelling to work sites
- using electronic message boards to display a reduced 40km/h speed zone along Condell Park Road, to help maintain safety for local residents.

Appropriate safety and environmental controls will be in place at all times. We will notify you in advance of any planned water or wastewater supply interruptions.

Investigation of alternate access routes to our work sites

We recognise that increased traffic and heavy vehicle movements remain a concern for many residents. Currently, Sutton Crescent, Berrima Road and Condell Park Road are the only available access routes to our work sites at the end of Condell Park Road.

Finding an alternative access route remains a priority for Sydney Water, and we continue to actively work with Transport for NSW and Wollondilly Shire Council to identify a solution that reduces construction traffic through local residential areas.

The Member for Wollondilly, Judy Hannan MP, and the NSW Minister for Water, the Hon. Rose Jackson, have also provided support. We will continue to keep you informed as our investigations progress.

Map of our work areas

- Sydney Water project office – 150 Condell Park Road
- Construction site 1 – New wastewater pumping station site
- Construction site 2 – New pipelines construction site
- Construction site 3 – Haslin Constructions work site compound
- Construction site 4 – New Wilton WRRF site

More information

If you have any questions or want to learn more about this work, please contact our Community Engagement Team:

- **Call:** 1800 678 098
- **Email:** wiltonnewtown@sydneywater.com.au
- **Visit:** sydneywater.com.au/wilton-new-town

You are also welcome to visit us at our community drop-in centre at 150 Condell Park Road, Wilton.

We appreciate the patience and understanding shown by local residents during our construction activities. We remain committed to keeping you informed, listening to your feedback and working closely with the community to minimise construction impacts wherever possible - while delivering the essential infrastructure needed to support Wilton's future growth.

Yours sincerely,

Soheil Saemian
