## Update about our work in your area – Hornby Street West to Camden Street, Wilton

Thank you for your continued patience and understanding as Sydney Water delivers new drinking water and recycled water pipelines in your area to service growing communities in the Wilton area.

We know our work has had a significant impact on local residents through road closures, detours and changing traffic arrangements, and we appreciate the community's ongoing support.

We are now in the final stages of this essential work in your area. While construction activities will continue across other areas of Wilton, work within your area is progressing well and is currently on schedule to be completed by late December 2026, weather and ground conditions permitting.

### Progress update

Since our previous update in March 2026, we have made significant progress towards completing our work in your area as part of the Wilton Integrated Servicing Program.

- All new drinking water and recycled water pipelines between Hornby Street West and Camden Street have now been installed.
- We are currently connecting and testing the new pipelines to ensure they operate as designed. This work is expected to be completed by late October 2026.
- The final stage of work involves removing temporary fencing and other construction materials, and restoring areas affected by our work, including:
  - roadways, footpaths and road verges
  - our storage area next to Hannaford Oval
  - our site compound at 1090 Argyle Street
  - the Crown Land Reserve along Camden Street.

  We are planning to complete the restoration work during November and December 2026.

A map of our work sites and restoration areas is provided on the last page.

## Restoring our work areas

We are working with Wollondilly Shire Council to restore areas affected by our work and support the long-term vision for the Wilton area, while enhancing the local environment.

Roadways, footpaths and road verges impacted by construction will be restored in consultation with Council and, where practical, returned to their pre-construction condition. All areas will be left in a safe and environmentally stable condition.

As part of the project, some trees needed to be removed. These trees will be replaced, although they may not be replanted in the same locations because of the new underground infrastructure and existing services. We are working closely with Council to identify suitable replacement trees and planting locations, including nearby bush regeneration areas.

In some locations, tree stumps and roots are close to underground services such as gas and telecommunication infrastructure. To avoid impacting these services, the stumps will be ground below the surface rather than being removed entirely. These areas will then be restored with topsoil and grass seed to blend with the surrounding landscape.

All restoration work must meet Council's requirements and their final inspection.

## About our work

As we complete the final stages of work in your area, our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.

To help ensure our work is delivered to schedule and to reduce the duration of construction impacts on local residents, there may be times when we need to work extended hours. If extended hours are required, we will contact you to provide further details before work starts.

## What to expect

- As we complete the remaining work, you may continue to notice heavy truck movements, noise and dust.
  - There will be trucks and other construction equipment with reversing beepers driving through and working in the area.
- Temporary traffic and pedestrian changes will be required during the remaining work.
  - Part road closures may be required at various times.
  - Traffic controls will be used to help vehicles and pedestrians move safely through the work area.
  - Traffic signage will be clearly visible to motorists and pedestrians approaching the work area to help keep everyone safe.

We understand that our work in your area can be disruptive and are committed to minimising impacts on the local community. We will continue to make every effort to minimise disturbance our work may have on you.

Appropriate safety and environmental controls will be in place at all times. We will notify you in advance of any planned water or wastewater supply interruptions.

## Map of our work sites and restoration areas

## Thank you

To thank the local community for its cooperation and support during our construction work, we are planning a community event in late November 2026, featuring free refreshments and children's activities.

We look forward to sharing more details about the event soon.

## More information

If you have any questions or want to learn more about this work, please contact our Community Engagement Team:

- **Call:** 1800 678 098
- **Email:** wiltonnewtown@sydneywater.com.au
- **Visit:** sydneywater.com.au/wilton-new-town

You are also welcome to visit us at our community drop-in centre at 150 Condell Park Road, Wilton.

We appreciate the patience and understanding shown by local residents during our construction activities. We remain committed to keeping you informed, listening to your feedback and working closely with the community to minimise impacts wherever possible - while delivering the essential infrastructure needed to support Wilton's future growth.

Yours sincerely,

**Soheil Saemian**
