1 October 2026

Extended work hours for pipeline construction – Wilton Road, Appin

Thank you for your patience as Sydney Water builds new drinking water, recycled water and wastewater infrastructure, to service growing communities in the Wilton area.

As part of this project, Sydney Water's contractor, Vaughan Infrastructure, has constructed a new drinking water pipeline along Wilton Road, Appin.

We are now in the final stages of this essential work.

About our upcoming work

For the next phase of this work, we will disinfect and test the new pipeline. The map of our work areas is provided on the next page.

Our standard work hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturday.

However, we need to work extended hours for this upcoming activity.

We are planning to complete this essential work on:

- **Saturday, 10 October 2026** from 7am to 6pm
- **Sunday, 11 October 2026** from 7am to 6pm**.**

This work will involve:

- securing the work areas and checking safety and environmental controls
- disinfecting and testing the new drinking water pipeline.

In the event of heavy rainfall, we may not be able to complete this work. If this occurs, we will contact you again with updated details before this work is rescheduled.

What to expect

- During the work, you may notice an increase in vehicle movements and noise.
  - There will be trucks and other equipment with reversing beepers working in the area.
- Traffic changes may be required during the work.
  - Temporary single-lane closures may be needed at various times before, during and after the work.
  - Motorists may experience minor delays, as traffic controls may be used to help vehicles move safely through the work area.
  - Reduced speed limits and traffic signage will be clearly visible to motorists approaching the work area to help keep everyone safe.

    Even when workers are not on site, please continue to follow road safety signage and reduced speed limits, as they remain in place if site conditions make it unsafe to remove them. These measures help protect motorists and all road users travelling through the area.

Minimising our impact on you

We understand extended work hours can be disruptive, and are committed to minimising the impacts of our work on the local community.

We will make every effort to minimise any disturbance our work may have on you by:

- positioning machinery away from residential properties where possible
- not running motors and equipment unnecessarily
- using traffic management controls to maintain safety and traffic flow around the work areas.

Appropriate safety and environmental controls will be in place at all times.

This work is not expected to interrupt your water supply.
